CENTRAL INTELLIGENCE AGENCY

Washington, D. C.

February 1955

This Gazetteer is issued as a standard component of the National Intelligence Survey for Peru and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. This Gazetteer also lists the variants of official standard names for reference purposes. These variants are not approved as standard names.

This Gazetteer will be adequately maintained by published revision.

Distribution of this publication is made by the Central Intelligence Agency and is for official use only.

FOREWORD

This gazetteer contains about 24,100 entries for places and features in Peru. The entries include approved standard names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The scale of map coverage is about 1:1,000,000 for about three-fourths of the country and about 1:200,000 for the coastal and southern parts.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.--Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the approved names by use of the word "see." Where part of a standard name is underlined, the use of the nonunderlined part is optional. Where two names are approved for a feature, each is identified in parentheses and either or both may be used. Names that consist of specific and other elements are alphabetized by specific part; thus Cerro del Abra is listed as Abra, Cerro del. Diacritical marks that occur on recommended names include the acute accent (as in Río), the tilde (Baños), and the dieresis (Güeppí). These marks are used on both capital and lower-case letters.

Designation.--Designations, in the second column, are sometimes abbreviated and represent groups of features, as follows:

ADMD	administrative division
BAY	bay, inlet
BCH	beach
CAPE	cape, promontory, headland
CHAN	channel
CNAL	canal
CLIF	cliff, bluff
CRNT	current

Latitude and longitude.--Coordinates, in the third and fourth columns, are for finding purposes only. Where the scale of sources permitted, they were read to the nearest minute.

Administrative division.--The number in the fifth column, 764, is the area number assigned to Peru.

Locational reference.--The number in the last column indicates a map or chart where the feature may be located by its standard name or a recognizable variant of its standard name, as follows:
