CENTRAL INTELLIGENCE AGENCY

Washington, D.C.

January 1962

This Gazetteer is issued as a standard component of the National Intelligence Survey for South Vietnam and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. This Gazetteer also lists the variants of official standard names for reference purposes. These variants are not approved as standard names.

This Gazetteer will be adequately maintained by published revision.

Distribution of this publication is made by the Central Intelligence Agency and is for official use only.

FOREWORD

This gazetteer contains about 17,400 entries for places and features in two lists: Southern Vietnam, 17,000 entries, and the South China Sea, 400 entries. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

Southern Vietnam is that part of the Republic of Vietnam south of the "Demarcation Line" at approximately 17° north latitude. The area of the South China Sea for which names are included in the gazetteer is that part south of 18° north latitude, west and north of the territorial limits of the Republic of the Philippines and British Borneo, east of 106° east longitude between 5° north and 8° north latitude, and elsewhere east of 110° east longitude. This area includes the Paracel Islands, the Dangerous Ground, and numerous other islands, reefs, and banks.

The names in this gazetteer supersede those in all previous Board lists for the area.

The map scale of name coverage in Southern Vietnam is approximately 1:250,000; the scale of coverage for the South China Sea is about 1:1,000,000, with coverage at larger scales for some areas.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name. — Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used.

Native-language elements in approved names do not contain diacritical marks, but French diacritical marks, chiefly the acute accent (´), the grave accent (`), and the circumflex (ˆ), are retained in French elements. (In the glossary of generic terms which follows, diacritical marks are retained in both Vietnamese and French words.)

A few village names include the initial abbreviations A.T., B., P., R., and W., each of which may stand for more than one Vietnamese word. Where included in the listing the abbreviation has not been positively identified with one of the alternatives.

In general, all separate words in approved names are capitalized except noninitial articles, prepositions, and conjunctions; for example, *di* and *den* in Vietnamese names and *de* in French names. In native names containing the apostrophe the letter following the apostrophe is usually but not always capitalized; both *B'Nom* and *B'nom* occur. The usage of Vietnamese source materials should be followed in such cases.

Designation. — The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in this gazetteer are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer

will vary with the quality of the maps of the area and with the nature of the entities that are named.

ADMD	administrative division (first-order, *tinh;* second-order, *quan*)
BAR	sand bar
BAY	bay (when named with the generic term *bai* the bays are commonly fringed by beaches)
BCH	beach
BGHT	bight (open body of water forming a slight recession in a coastline)
BNKM	marine bank (broad area of the continental shelf less deep than adjacent areas on one or more sides but not so shallow as to be a hazard to navigation)
CAPE	cape (seaward end of a projection of land of such position and size as to cause coastwise shipping to change course; see also PT)
CHNM	marine channel (channel between coastal islands, reefs, or shoals or between an offshore feature and the mainland)
CHNS	stream channel (the separately named lesser channel around an island or shoal in a stream)
CNLI	irrigation canal
CNLN	navigation canal (includes some suitable only for small boats)
COVE	cove
ENTR	entrance (narrow opening from the sea into a smaller waterbody)
ESTA	agricultural estate (plantation)
FLT	sand flat (tidal flat composed of sand)
FRST	forest
FT	fort (military post with or without fortification; some may be abandoned or no longer have a military function)
GULF	gulf
HLL	hill (generally less than 500 meters elevation, small summit area, and moderate relief)
HLLS	hills
ISL	island
ISLP	land-tied island (joined to the mainland by natural processes of coastal deposition)
ISLS	islands
LGN	lagoon (waterbody along a coast, wholly or largely cut off from the sea by a barrier beach or other depositional feature)
LGNX	section of lagoon
LK	lake
LKS	lakes
MT	mountain (generally more than 500 meters elevation, small summit area, and substantial relief)
MTS	mountains, mountain range
PASS	pass (way over or through an area of mountains or other high land)
PCLI	independent political entity (republic)
PEN	peninsula
PLAT	plateau (extensive elevated area of flat to rolling surface; may be highly dissected in part)
PLN	plain
PND	pond (small inland waterbody)
PPL	populated place (city, town, village, settlement, dispersed rural community; with or without administrative functions; includes places symbolized as urban on medium- and small-scale maps but as dispersed communities on large-scale maps)
PPLX	section of populated place
PT	point (end of a relatively minor projection of land into a waterbody; see also CAPE)
RDGE	ridge (elongated relief feature usually with a narrow crest or series of summits)
RF	reef(s) (offshore hazard to navigation, usually characterized by submerged rocks)
RGN	region (area recognized as an entity by reason of the unity of its history, people, or landscape)
RKL	rock on land

APPROVED FOR RELEASE: 2007/02/21: CIA-RDP01-00707R000100120001-4

APPROVED FOR RELEASE: 2007/02/21: CIA-RDP01-00707R000100120001-4

RKSW	rocks in water (often associated with reefs)
RKW	rock in water
RPDS	rapids (may include some waterfalls not distinguished from rapids)
RSTN	railroad station
RSTP	railroad stop
RSV	reservoir (large impoundment of water)
SEA	sea
SEAX	section of sea (area of such character as to be recognized as an entity, but not a gulf or other arm of the sea or a submarine feature)
SHOL	shoal (offshore hazard to navigation generally composed of unconsolidated material, some having scattered submerged rocks)
SPNG	spring
STM	stream (river or other running fresh waterbody, perennial in whole or in part)
STMA	anabranch (stream channel that leaves and rejoins the main stream after a separate course for a considerable distance)
STMD	distributary (stream flowing from a larger stream into another waterbody; characteristic of deltas)
STMI	intermittent stream (no part indicated as perennial)
STMM	stream mouth
STMX	section of stream (separately named part of a continuous stream not delimited by significant confluences)

Latitude and longitude. — Coordinates, in the third and fourth columns, are for finding purposes only. They were generally read to the nearest minute. For precise location, large-scale maps should be used.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of capes and points, near the centers of areas, and at the midpoints of most other features.

Area number. — The number in the fifth column indicates the administrative unit in which the place or feature is located, as listed below.

Southern Vietnam is divided into 42 first-order administrative divisions, four of which (Sai Gon, Da Lat, Da Nang, and Hue) are essentially urban in character. For convenience of reference, the four urban divisions are combined with the rural divisions in which they are geographically located (see numbers 46514, 46532, 46546, and 46547). The general number for Southern Vietnam (46500) is used for international features and for features common to two or more subordinate units.

46500 Southern Vietnam (General)
46501 Con Son
46502 An Xuyen
46503 Ba Xuyen
46504 Kien Giang

01 Vietnam, 1:250,000, National Geographical Service, Da Lat, 1957–1960; scale 1:250,000. (Coordinates expressed in grads with longitude based on Paris)

02 *Viet Nam 1:500,000,* National Geographical Service, 1961; sheets 6, 8, 10, 11, and 12. (Coordinates expressed in both degrees and grads, with longitude based on Greenwich and Paris, respectively)

03 *Carte de l'Indochine,* Service Géographique de l'Indochine (some sheets Survey of India), 1901–54; scale 1:100,000. (Coordinates expressed in grads with longitude based on Paris; reprinted as AMS L605 with addition of corner coordinates expressed in degrees with longitude based on Greenwich)

04 *Nam-Phan* (Southern Vietnam), National Geographical Service, Da Lat, 1957; scale 1:500,000. (Coordinates expressed in grads with longitude based on Paris)

05 *Trung-Nguyen Trung-Phan* (Central Part Central Vietnam), *Cao-Nguyen Trung-Phan* (Central Vietnam Plateau), and *Nam-Phan* (Southern Vietnam), Cadastral Service of Vietnam, 1959; scale 1:400,000. (No latitude or longitude indicated)

06 French hydrographic charts and pilots, Service de la Marine, Paris; various scales and dates.

07 United States hydrographic charts and sailing directions, Department of the Navy, Washington, D. C., various scales and dates.

The code 00 is used for cross-references and for the standard names to be found only on references other than those listed above.

Coordinates on some of the above maps are expressed in grads with longitude based on Paris rather than on degrees and minutes with longitude based on Greenwich. To convert grads into degrees and minutes, multiply by .9 and convert hundredths of degrees to minutes. Add 2°20′ to convert Paris longitude to Greenwich longitude. To convert degrees and minutes into grads, change minutes to hundredths of degrees and multiply by 1.11. In the case of longitude based on Greenwich, first convert to the meridian of Paris by subtracting 2°20′.

Glossary of generic terms

The following terms occur in the standard names listed in the gazetteer. The meanings given include those supported by application to features named in the gazetteer, whether or not these meanings are given in dictionaries.

This list includes several terms that are commonly abbreviated as shown in the second column as well as abbreviations which cannot be expanded with certainty and which may or may not represent generic terms. The language of each term, or the name of the tribe inhabiting the area where the term is used is indicated by the use of capital letters—C, Chinese; F, French; K, Khmer (Cambodian); L, Laotian; M, Malay; V, Vietnamese (Annamese)—and by tribal names.

Additional name lists

The following publications contain names not included in this gazetteer and may be helpful as finding list(s), though the additional names in them are not necessarily those that would be approved by the Board as standard names:

1. *Gazetteer to AMS 1:250,000 Maps of Indochina* (Series L 509), Washington, 1958.
2. *Gazetteer of Indo-China,* Director of Survey (India), 1945.
3. *French Indochina and South China Sea,* Publication No. 892, Hydrographic Office, Department of the Navy, Washington, 1944.
4. *Indochina Place Name List,* two volumes, National Security Agency, Washington, 1957.

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for future printings by reporting errors to the Board on Geographic Names, Department of the Interior, Washington 25, D. C. A statement of the source of the correct information will be helpful.
