FOREWORD

This gazetteer contains about 37,000 entries for places and features in Lebanon. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The basic name coverage corresponds to that of maps at the scale of 1:50,000. Entries include the names of first- and second-order administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

Virtually all names on *Lebanon 1:50,000,* K724, 2nd edition, U. S. Army Topographic Command, now in the process of publication, are among the approved names contained in the gazetteer. Approved names not locatable on this map series may be found by recognizable variant forms on *Lebanon 1:50,000,* AMS K724, Army Map Service, 1960, or *Carte du Liban 1/20,000,* Ministère de la Défense Nationale, 1963-69 (French edition).

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see". Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus Tallat al Ḩaylūn, the name of a hill, is listed as Ḩaylūn, Tallat al and Wādī al Jarnīf, a wadi, is listed as Jarnīf, Wādī al.

As far as possible, Arabic names in the gazetteer have been romanized from Arabic script according to the transliteration system used jointly by the Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use (the BGN/PCGN 1956 System), which follows on pages ix-xiii. It is almost always necessary to add missing symbols for short vowels (vowel points) in Arabic script and to rewrite dialectal forms in standard written Arabic. Names found written only in roman letters but recognizable as Arabic have been reconstructed into Arabic script and then transliterated.

In a few cases, where it was not possible to determine complete BGN/PCGN Arabic forms, names have been given in the form found in romanized sources and marked with an asterisk (*) preceding the designation; however, individual Arabic words recognizable in these names have been rendered in the system.

The diacritical marks used in approved Arabic names in Lebanon are the macron (¯), the cedilla (¸), and the acute accent (´). These marks are to be used whether the names are written in capital or lowercase letters. In addition, the apostrophe (') and the inverted apostrophe ('), representing the letters *hamzah* and *'ayn,* respectively, frequently occur in Arabic names.

In writing Arabic names in capital and lowercase letters, every word in a name should be initially capitalized except the following when they are not name-initial: *wa* (and) and the definite article *ad, aḍ, adh, al, an, ar, as, aṣ, ash, at, aṭ, ath, az* and *aẓ.* In French names the initial letter of each word is capitalized except for noninitial articles, prepositions and conjunctions.

Cross-references have not been provided in the gazetteer for variant names which differ from approved names only in the spelling of the following generic terms:

Designation.—The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied *in this gazetteer* are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Lebanon some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADMD first-order administrative division (*muḥāfaẓat*); second-order administrative division (*qaḍā'*)
AIRF airfield (place where aircraft land and take off, with runways and related improvements but without well-developed facilities for the commercial handling of passengers and cargo)
AIRP airport (place where aircraft regularly land and take off, with runways and major facilities for the commerical handling of passengers and cargo)
ALUV alluvial fan (alluvial deposit of a stream where it issues from a gorge upon an open plain)
AREA area (tract of land identified by a name, but without homogeneous character or established boundaries; may be identified and named for characteristics which no longer pertain to it)
BAY bay
BDG bridge
BDGN natural bridge
BGHT bight (open body of water forming a slight recession in a coastline)
BLDG isolated building
BRKS barracks
BSNH headwater basin (basin at or near the headwaters of one or more drainage areas or a named part of such a basin)
CAPE cape (seaward end of a projection of land of such position and size as to affect the course of ships)
CAVE cave(s) (underground cavity, usually in soluble rock)
CH chapel; church
CLF cliff(s) (high, steep rock face overlooking a lower area, such as a waterbody, coastal lowland, or valley)
CMP camp(s)
CMPM military camp
CMTY cemetery
CNFL confluence (place where two or more streams flow together)
CNLI irrigation canal
COVE cove (small bay)
CPRF refugee camp
CSTL castle (large fortified building or set of buildings)
CTN cistern (covered tank or reservoir for the storage of water, usually masonry lined and below ground level)
CULT cultivated area
CUT road cut
CVNT convent
DAM dam (barrier constructed across a stream to impound water)
DPR depression (more or less saucer-shaped area surrounded by higher land; ordinarily has interior drainage)
DTCH irrigation ditch
FORD ford (place where a stream may be crossed safely without a bridge or boat)
FRM farm (small agricultural unit consisting of a farmstead and associated land, usually owned and operated by a single family; includes poultry farms)
FRMS farms
FRST forest; woods
FT fort (defensive structure or works, generally of little or no present military significance; may be in a state of ruin)
GND public garden
GRGE gorge (relatively narrow, steep-sided segment of a watercourse); defile (narrow passageway or constricted section of a valley)
HDLD headland (conspicuously high piece of land jutting out into or fronting the sea)
HERM hermitage (Maronite sect)
HLL hill (landform of moderate relief, moderate elevation, and small summit area)

HLLS	hills
HSE	isolated house(s) (may include some buildings other than dwellings)
HSP	hospital; sanatorium
INDS	industrial area
INN	inn
ISL	island
ISLS	islands
KRST	karst area (limestone or dolomite area distinguished by surface and subterranean forms caused by the action of water on the soluble rock)
LCTY	locality (minor area or place of unspecified or mixed character and indefinite boundaries)
LDG	Druse lodge (Druse place of worship)
LK	oxbow lake (lake in the channel of a former stream meander)
LKI	intermittent lake (seasonal waterbody which becomes a lake during periods of rain but which dries up or becomes a marsh or waterhole during the dry season)
MFG	factory
MKT	market place
ML	mill(s)
MN	mine
MNMT	monument
MRSH	marsh (wetland characterized by grasses or bush vegetation and few or no trees; many include one or more permanent or intermittent waterbodies surrounded by marsh but not separately named)
MSQE	mosque (Islamic place of public worship)
MSTY	monastery
MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)
MTS	mountain range; mountains
OCH	orchard(s)
PAL	palace (includes presidential residence and the residence of the Patriarch of Antioch)
PASS	pass (way over or between mountains or other high land)
PCLI	independent political entity (republic)
PK	peak (separately named summit on a more extensive elevation)
PKS	peaks
PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level)
PLN	plain (landform of low relief, slope, and elevation)
PMPW	water-pumping station
PND	pond (small standing waterbody)
PNDI	intermittent pond
PNDS	ponds
POOL	pool; intermittent pool
PP	police post
PPL	populated place (city, town, village, settlement; includes dispersed rural settlements)
PPLX	section of populated place (part of a city or contiguous urbanized area named as an entity but having no known administrative status)
PRN	prison
PROM	promontory (piece of an area of high, generally flat land jutting into surrounding lower land; similar to a headland except for its inland location)
PT	point (relatively minor projection of land, or its extremity, into a waterbody)
RDBN	road bend (includes hairpin turns)
RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)
RDJC	road junction
RGN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or a combination of conditions)
RKFL	rockfall (mass of fallen rocks, usually at the base of a cliff)
RKL	rock on land (boulder, pinnacle, crag, or other rock or rock outcrop situated on land)
RKSL	rocks on land
RKW	rock in water (individual rock of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named)
RLGR	retreat (place of seclusion for a religious society)

ROAD road; highway interchange (traffic circle)
RSRT resort (one or more buildings used chiefly for recreation and associated service activities, usually with accommodations for guests)
RSTN railroad station
RSV reservoir (large artificially impounded body of water)
RUIN ruin(s) (structure in a state of ruin, but not necessarily of great antiquity or archeological interest)
RVN ravine (short, steep watercourse)
SCH school
SCHC college
SCHM military academy
SCRB scrubland (a tract of country with vegetation consisting chiefly of dwarf or stunted trees and shrubs)
SDL saddle (moderately lower place between two summits or other elevations on a ridge or mountain)
SEA sea
SHPF sheepfold (may include goat pens)
SHRN shrine
SINK sinkhole (hole, cavern, or funnel-shaped cavity made in the earth by the action of water on the soil, rock, or underlying strata)
SLP slope (gradient on the side or end of an elevated relief feature)
SPNG spring(s)
SPUR spur(s) (short sloping ridge extending laterally from a mountain or other elevation)
SQR city square (broad paved area)
STAT statue
STDM stadium
STM stream (river or other running fresh waterbody, perennial in all or a part of its course)
STMC canalized stream (stream that has been canalized, ditched, diked or straightened for any purpose, yet retains in part the characteristics of the original stream)
STMX section of stream
STNR radio station
TMB tomb(s)
TOWR tower
TRL trail (includes paths)
TRR terrace (more or less level surface of intermediate elevation between higher and lower adjacent surfaces)
UPLD upland (broad elevated area with low to moderate surface relief; includes separately named segments of an unnamed plateau)
VAL valley (area drained by a stream, or a named segment of such an area); rift valley (trough-shaped depression between two roughly parallel faults and faced by escarpments on each side)
VIN vineyard
VINS vineyards
WAD wadi (watercourse or drainageway that carries only occasional flows of water)
WADX section of wadi
WLL well (dug or drilled source of water)
WLLS wells

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of capes and points, and near the centers or midpoints of other features.

Area number.—The number in the fifth column indicates the first-order administrative division (*muḥāfaẓat*) of Lebanon in which the place or feature is located, as listed below:

40800 Lebanon (general)
40801 Bayrūt
40802 Ash Shamāl
40803 Jabal Lubān
40804 Al Janūb
40805 Al Biqāʿ

The general number (40800) is used for international features and for features in two or more first-order administrative divisions.

NOTES

1. *Hamzah* is written in Arabic over all initial *alifs* except those which belong to the definite article *al* or bear a *maddah* (see note 10). When the purpose is to indicate the presence of the sound described as a glottal stop, it is written over internal and final *alif*, *wāw*, and *yā'* (without dots). *Hamzah* following i is written ئ (almost always the *yā'* is in the ـيـ or ـيـ form) and the dots are omitted. Example: بئر. *Hamzah* following u is written ؤ. *Hamzah* following a long vowel is written ء without anything under it ("without a bearer"). The transliteration of *hamzah* (') should always be carefully distinguished from that of *'ayn* (ʿ).

2. *Alif* as such is not transliterated when it is bearer of *hamzah*, but see *fatḥah alif* and *alif maddah* in Table II. See also note 1 above and note 10.

3. An original *tā'* in certain endings is written ة (i.e., *hā'* with two dots) and is called *tā' marbūṭah*. It is transliterated h (silent), except when followed by another word in a unitary expression, when it is transliterated t, as in *hamzah* (isolated form) and *hamzat al waṣl*. A pronounced final *hā'* occurs and for bibliographical purposes may be transliterated /h when a *fatḥah* precedes it (Al Mara/h). Cf. also note 4.

4. The two-letter symbols th, kh, dh, sh, and gh are convenient for use and easily comprehensible. The infrequent sequences of t, k, d, or s followed by h can be unequivocally transliterated for bibliographical purposes by the use of a slant line ("shilling," "solidus") to separate true h from a preceding t, k, d, or s; that is, th represents *thā'*, but t/h stands for *tā'* followed by *hā'*. Cf. also note 3.

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200030006-8

5. Where special considerations are paramount, the sub-dot (ḥ, ṣ, ḍ, ṭ, ẓ) may be used in place of the cedilla (ḫ, ş, d̦, ț, z̦).

6. The letter *yā'* is also used in writing *alif maqṣūrah* in which the dots are omitted. See Table II.

NOTES

7. The classical Arabic grammatical endings written with the so-called nunation symbols (Arabic *tanwīn)* may be transliterated when necessary by a^n, i^n, u^n. In modern Arabic these endings have become silent and are omitted in transliteration: classical *alifu*^{n}, modern *alif.*

8. Doubled consonant sounds are written in Arabic by placing the *tashdīd* over the consonant letter written once. In transliteration the letter should be doubled. When the definite article *al* precedes a word beginning with t, th, d, dh, r, s, sh, ṣ, ḍ, ṭ, ẓ, l, n (the so-called "sun letters"), the l is assimilated in pronunciation, giving tt, thth, etc. In transliteration this l should be omitted and the following letter written twice, once after the a of the article and secondly at the beginning of the next word. Example: An Nīl, not Al Nīl.

9. *Hamzat al waṣl* is transliterated ' in classical forms, as illustrated in its classical name *hamzatu 'l waṣli,* but ignored in modern forms, as in *hamzat al waṣl.*

10. *Maddah* is a horizontal wavy line over *alif.* Since *maddah* nearly always occurs in word-initial position, no confusion results from the use of ā for *alif maddah* as well as for *fatḥah alif.*

SPECIAL RULES

The following notes explain details of transliteration not stated above.

1. Initial definite articles and prepositions should be capitalized and hyphens should not be used to connect parts of names; e.g., Ash Shāriqah and Tall al Laḥm.
2. If any evidence is found for the use of the definite article in a name, the article will be used in the name chosen.
3. The Arabic word for God will be written Allāh.
4. Phrase names, commonly transcribed as one word, will be written in separate words. The definite article within such names will be written al, not ul; e.g., 'Abd Allāh, 'Abd ar Raḥmān, Dhū al Faqār.
5. The word Ibn will be transliterated Bin wherever written without *alif,* that is, between two proper nouns; e.g., 'Umar Bin al Khaṭṭāb.
6. The Turkish word Paşa will be transliterated directly from Arabic script as Bāshā; the Turkish word Bey will be romanized as Bey in Egyptian names, no matter how written in Arabic-language sources, but in other Arabic areas as Bak where written *bā'–kāf* and as Bayk where written *bā'–yā'–kāf.*
7. The modern colloquial word Sīdī will be given precedence over the classical form Sayyidī. (This does not preclude the spelling Sayyidī if the latter is indicated by the Arabic script or other evidence – for instance if the *yā'* is written with *tashdīd.)*
8. The colloquial word Bū will not be changed to the classical form Abū.
9. The colloquial word for water written *mīm–yā'–tā'* on Arabic maps will be transliterated Mayyat.
10. In place names of Aramaic origin in Lebanon and Syria with an initial cluster beginning with b plus another consonant such as l or h, initial clusters such as bl and bh will be written.
11. In names containing the words for "back, ridge, hill" appearing as either *ẓā'–bā'–rā'* or *ḍād–bā'–rā'* in Arabic sources, the spelling used in the sources will be followed.
