FOREWORD

This gazetteer contains about 38,000 entries for places and features in Zambia. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the areas concerned.

The basic name coverage corresponds generally to that of maps at the scale of 1:250,000. Entries include the names of first- and second-order administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one or more of the following sources:

1. *Gazetteer of Geographical Names in the Republic of Zambia,* Ministry of Lands and Mines, Government Printer, Lusaka, 1966.
2. *Federation of Rhodesia and Nyasaland 1:250,000* (and other titles), Federal Department of Trigonometrical and Topographical Surveys and others, 1957-1970.
3. *Zambia 1:50,000* (and other titles), Directorate of Overseas Surveys and others, 1950-1970.
4. *Northern Rhodesia 1:50,000* (and other titles), Federal Department of Trigonometrical and Topographical Surveys and others, 1959-1970.
5. *Federation of Rhodesia and Nyasaland 1:100,000,* Department of Federal Surveys, 1960.

Evaluation

The local official map sources used in this study were in large part compiled from aerial photography of the 1956-64 period, and were adequate for interpretation of the named features. Zambia started in 1953, and has pursued intermittently, a national name standardization program. In 1966 it issued a *Gazetteer of Geographical Names in the Republic of Zambia* with approximately 35,000 main entries and variant names, indicating by type style those names approved by the Geographical Place Names Committee or Authority, as it now is called, or by recognized experts in Lusaka. That gazetteer was taken as the principal authority for spellings. As the Zambian gazetteer lists only the specific parts of names, it was frequently necessary to add generic terms for features as found on map sources with the concurrence of the Survey Department, Republic of Zambia.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see". Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus Lake Chaya, the name of a lake, is listed as Chaya, Lake. Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Local names of international features are identified by major-political-entity labels. Where only one country is identified parenthetically, no name is available for the feature in the other country or countries.

Name entries which have an asterisk (*) preceding the designation are those taken from the *Gazetteer of Geographical Names in the Republic of Zambia* for features which were not named on any map available to the Board on Geographic Names.

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200020010-4

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200020010-4

Designation.—The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied *in this gazetteer* are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named.

ADMD	first-order administrative division (*province*); second-order administrative division (*district*)
AIRF	airfield (place where aircraft land and take off, with runways and related improvements but without well-developed facilities for the commercial handling of passengers and cargo)
AIRL	landing strip (paved or unpaved runway lacking most airport facilities and other improvements)
AREA	area (intensive conservation area); or (tract of land identified by a name, but without homogeneous character or established boundaries; may be identified and named for characteristics which no longer pertain to it)
BAY	bay (coastal indentation of a size intermediate between a gulf and a cove)
BDG	bridge
CHNL	lake channel (channel between islands in a lake or between islands and the mainland)
CMP	camp (permanent camping place)
CMPL	logging camp
CMPR	restcamp (camp maintained for the use of government officials on tour)
CMPW	game camp, game guard camp, game guard post
CMTY	cemetery
CNL	canal (undifferentiated as to function)
COVE	cove
CTHS	courthouse (includes local courts or councils called *kuta* in Western Province)
DAM	dam (barrier constructed across a stream to impound water; may include the reservoir)
DMBO	dambo (shallow grassy valley formation between wooded areas)
FLLS	waterfalls
FLLX	section of waterfalls
FORD	ford (place where a stream may be crossed safely without a bridge or boat)
FRM	farm (includes a wide range; from small, single-family units to ranches, estates, and large landholdings)
FRMS	farms
FRST	forest; woodland(s)
FY	ferry (includes boat and terminal facilities)
GRGE	gorge (relatively narrow, steep-sided part of a streamcourse)
HBR	harbor (body of water providing shelter for boats)
HLL	hill (landform with moderate relief, moderate to low elevation, and small summit area)
HLLS	hills
HSPD	dispensary
HSPL	leprosarium
HTL	hotel
INLT	inlet (drowned indentation in the shore of a lake or reservoir, usually at the mouth of a stream)
ISL	island (includes moderately elevated drier areas in wetlands)
ISLP	land-tied island (island-like feature connected to a larger land area by a narrow isthmus)
ISLS	islands
ITTR	research institute
LCTY	locality (minor area or place of unspecified or mixed character and indefinite boundaries)
LK	lake; oxbow lake (includes features designated "lagoon" in the *Gazetteer of Geographical Names in the Republic of Zambia*)
MFG	factory (plant, mill, or other establishment where goods are processed or manufactured)
MLPO	mulapo (small elongated depression containing water)
MN	mine
MNMT	national monument
MNQ	abandoned mine
MSNQ	abandoned mission
MSSN	mission

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200020010-4

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200020010-4

MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)
MTS	mountains
NSY	nursery (forest)
PAN	pan (shallow depression retaining water after rains)
PANS	pans
PASS	pass (way over or between mountains or other elevated land)
PCLI	independent political entity (republic)
PEN	peninsula (area of land projecting into and largely, but not entirely, surrounded by water)
PK	peak (separately-named summit on a more extensive elevation)
PLAT	plateau (small area of flat to rolling surface in a well-dissected upland region)
PLN	plain (includes flats, floodplains, and other low, level areas subject to seasonal inundation)
POOL	pool(s)
PP	police post, police station
PPL	populated place (city, town, village, settlement or other agglomeration of buildings where people live)
PPLQ	abandoned village (designated "O.V."—"old village" in the *Gazetteer of Geographical Names in the Republic of Zambia*)
PPLX	section of populated place (part of a city or contiguous urbanized area named as an entity but having no known administrative status)
PRK	national park
PROM	promontory (piece of an area of high, generally flat land jutting into surrounding lower land; similar to a headland except for its inland location)
PRSH	parish (ecclesiastical district)
PS	power station
PT	point (relatively minor projection of land into a waterbody, or its extremity)
RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)
RDJC	road junction
RES	reserve (land set aside for unknown, multiple or unspecified purposes; includes some areas designated ethnic reserves)
RESF	forest reserve (area under public management and controlled use)
RESW	game reserve (area set aside for the habitation of game)
RGN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or a combination of conditions)
RKL	rock on land (boulder, pinnacle, crag, or other rock or rock outcrop situated on land)
RKSL	rocks on land
ROAD	road
RPDS	rapids
RSD	railroad siding
RSTN	railroad station (building used for the transaction of railroad business, located beside a railroad track at a point where trains regularly stop to take on and discharge passengers or freight)
RSV	reservoir (large artificially impounded body of water; may include the generic term "dam" in the name)
RVN	ravine (short, steep, V-shaped watercourse)
SCH	school (includes those listed as "secondary school" in the *Gazetteer of Geographical Names in the Republic of Zambia*)
SCHC	college (includes teacher training colleges)
SCHU	university
SCRP	escarpment (line of cliffs or steep slopes facing in one direction, caused by differential erosion or faulting or both; may extend more or less continuously for many miles)
SITE	site (any archeological site of the Stone Age Periods)
SLLO	silalo (section of a district in Western Province)
SPNG	spring(s); hot spring(s)
STM	stream (river or other running fresh waterbody, perennial in all or a part of its course; may include a "dambo" in its course)

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200020010-4

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200020010-4

STMA	anabranch (stream that leaves the main stream and rejoins it after following a separate course for a considerable distance)
STMX	section of stream (separately named part of a stream, not delimited by significant confluences)
STN	station (cattle cordon station)
STNA	agricultural station
STNF	forest station
STOR	store(s)
VAL	valley (area drained by a stream, or a named segment of such an area); rift valley (trough-shaped depression between two roughly parallel faults and faced by escarpments on each side)
WLL	well (dug or drilled source of water)
WTC	watercourse (channel or cut in a wetland)
WTLD	wetland (marsh, swamp, or other poorly drained area with unspecified vegetation)
WTRH	waterhole (place in an otherwise dry area where water is obtained by wild or domestic animals; includes rain pools)
XRD	crossroads

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only. Where features could be located on maps, coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of points, and near the centers or midpoints of other features. In the case of asterisked (*) entries (See Interpretation of Entries, above) the coordinates are those given in the *Gazetteer of Geographical Names in the Republic of Zambia.*

Area number.—The number in the fifth column indicates the first-order administrative unit (*province*) in which the place or feature is located, as listed below:

576.00 Zambia (general)	576.05 Central
576.01 North-Western	576.06 Eastern
576.02 Copperbelt	576.07 Northern
576.03 Western	576.08 Luapula
576.04 Southern	

The general number (57600) is used for international features and for features in two or more first-order administrative units.

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for future printings by reporting errors to the Board on Geographic Names, Department of the Interior, Washington, D.C. 20240. A statement of the source of the correct information will be helpful.

Geographic names or their spellings do not necessarily reflect recognition of the political status of an area by the United States Government.

Created in 1849, the Department of the Interior—America's Department of Natural Resources—is concerned with the management, conservation, and development of the Nation's water, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs and for standardization of Federal usage of both domestic and foreign geographic names.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States—now and in the future.
