MEMORANDUM FOR: Director, Intelligence Community Staff
Director, Office of Program and Budget Coordination

INFO: Director, Office of Community Coordination
Director, Office of Assessment and Evaluation

FROM: [redacted] 25X1
Director, Office of HUMINT Collection

SUBJECT: Community Computer Requirements

1. The National HUMINT Requirements List (NHRL). OHC has one basic Community computer requirement: the National HUMINT Requirements List (NHRL) (the Office of Data Processing work statement is available in OHC). The NHRL is currently being implemented on a severely limited scale on the CIA computer (GIMS). The major modification needed to adapt NHRL for a Community (vice CIA) computer would be terminals at the various departments and agencies which accept collection responsibility under the National HUMINT Collection System (NHCS) or wish to input amplifying requirements. We would welcome an opportunity to work out specifics with [redacted] including some modifications of the original concept. 25X1

[redacted] 25X1

3. In addition to the foregoing, a number of unresolved Intelligence-Community-wide data handling issues might be suitable for a computer or for linkage via such a computer. For example, various single agency systems exist for requirements and to notify interested parties of information potential. Specific systems (not necessarily computerized) exist for knowledgeability briefs (KBs); notifications of intelligence

potential (NIPs)--an internal DoD program; notifications of foreign travel (NOFTs)--also an internal DoD program; and two DDI/CRES computerized requirements systems, one for [redacted] and one for general requirements. General requirements systems also exists at DoD. It would seem appropriate to look at these systems for Community applicability, tie-in with other Community endeavors, e.g., the NHRL, or for data retrieval purposes (communication). 25X1

[redacted] 25X1

5. Related to para 4 above, consideration should be given to the utility of improving computer linkages between non-intelligence agencies and the Intelligence Community. For example, Library of Congress indices are computerized but there is no link to CIA. 25X1
