CENTRAL INTELLIGENCE AGENCY

WASHINGTON, D. C.

November, 1953

This Preliminary Gazetteer for Mongolia is issued in one volume as part of the National Intelligence Survey program and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area.

This Gazetteer is issued on a preliminary basis to expedite availability of this work material for use in the preparation of the National Intelligence Surveys. It is contemplated that major additions and revisions will be published in supplemental volumes and that subsequently the material will be consolidated and published as a standard component of the National Intelligence Survey for Mongolia.

Distribution of this publication is made by the Central Intelligence Agency. This document carries a RESTRICTED classification but individual names thereof are unclassified.

FOREWORD

This gazetteer contains about 11,600 entries for places and features in Mongolia. The scale of map coverage is about 1:1,500,000.

Glossary of generic terms

The following glossary contains generic terms occurring in the standard names listed in the gazetteer. Each of the meanings given applies in the case of one or more of the names.

altay	mountain range
aymag	district
bulag	spring
chuluu	mountain
dabaa	pass, mountain, mountain range
dalay	lake
elese	sands
godzogor	mountain
gol	stream, spring, lake
hada	mountain
hira	mountain(s)
hötöl	pass
hudag	well
khrebet	mountain range
möron	stream
nuruu	mountain(s), mountain range
nuur	lake(s)
oboo	obo
öndör	mountain
oroy	mountain
saridag	mountain range, mountain
shanda	well, spring
su	stream
tayga	mountain range
teeg	mountain
tologoy	mountain, hill
toyrim	lake
usa	well, spring, lake
uula	mountain, mountain range

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to adapt it to the machine method of tabulation.

Name.--Standard names and cross-references from variant names appear in the first column. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Where part of a name is underlined, the use of the nonunderlined part is optional.

Frequently it happens that Mongolian maps do not agree as to the type of feature at a given location. For example, one map may show a well, another a spring, and another a habitation or other feature. These various features bear the same specific name or a variation of it. In such cases only one name is recommended for the location. The variant names, whatever they designate, are cross-referenced to the recommended name.

Designation.--Designations, in the second column, are sometimes abbreviated and represent groups of features, as follows:

ADMD	administrative region	LAKS	lakes
DIST	district	MRSH	marsh, swamp
DSRT	desert	MT	mountain
ISL	island	MTS	mountains, range(s)
