APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

FOREWORD

This gazetteer contains about 22,000 entries for places and features in Cambodia. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

The name coverage corresponds approximately to that on maps at the scale of 1:250,000, supplemented from maps at the scale of 1:50,000. Entries include the names of first- and second-order administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

Most of the entities can be identified and located by the approved name or recognizable variant of the approved name on one or more of the following sources:

1. *Joint Operations Graphic* (Ground), Series 1501, Army Map Service/U.S. Army Topographic Command, 1966-67; scale 1:250,000.

2. *Cambodia 1:50,000*, Series L7016, Army Map Service (now U.S. Army Topographic Command), 1966-67.

3. *Cambodia 1:50,000*, Series L7011, Army Map Service (now U.S. Army Topographic Command), 1961-66.

4. Navy hydrographic charts, U.S. Naval Oceanographic Office, various dates and scales.

Evaluation

The overall quality of the names in this gazetteer is good. Most names were romanized by the BGN/PCGN 1962 system with modifications to 1971, from Khmer forms on the *Cambodia 1:50,000* Series L7011 and L7016 TOPOCOM maps. The Service Géographique des Forces Armées Nationales Khmères (formerly Service Géographique des Forces Armées du Royaume Khmère) provided these Khmer forms for names throughout the country, including areas where Cham, Laotian, Upland Mon-Khmer, or Vietnamese are spoken locally.

Orthographic inconsistencies and omissions of Khmer diacritical marks, which are common in Khmer writing, could usually be resolved by recourse to reference works. Minor spelling errors in the source materials were corrected where possible, and the spellings of some frequently recurring words, such as *Khêt, Rœssei, Vihéar,* and *Kaôh,* have been normalized in the gazetteer.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus *Phnum Diyŏn,* the name of a hill, is listed as *Diyŏn, Phnum.* Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Local names of international features are identified by major-political-entity labels. Where only one country is identified parenthetically, no name is available for the feature in the other country or countries.

The majority of the geographic names in this gazetteer consists of local spellings romanized from Khmer script in accordance with the BGN/PCGN 1962 Romanization System for Cambodian (Khmer) and recent modifications thereto which appear on pages vi through xi. A limited number of French and English conventional names also appear; e.g., Baie de Saracen, Gulf of Thailand.

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

The apostrophe appears only in names romanized from Khmer script and represents a consonant (glottal stop), as in the following words: 'Neăk, L'ák, Rô'čl. In addition to đ and ç, which may appear in Vietnamese and French words respectively, the following diacritical marks may appear on various vowel letters in names of the following types: (The letter v represents a vowel letter.)

Romanized Khmer:	acute (v̀), circumflex (v̂), breve (v̆)
Romanized Laotian:	acute (v́), circumflex (v̂), grave (v̀)
Romanized Thai:	none
French:	acute (v́), circumflex (v̂), grave (v̀), dieresis (v̈)
Vietnamese:	(v́ v̄ v̉ v̀ ṿ ấ ấ ẩ ầ ậ ắ ẳ ằ ặ)

When written in both capital and lowercase letters, each separate word in a name should begin with a capital letter, with the exception of the French preposition *de* and of the Vietnamese particles *đi, đến, từ, và*. Except in names labeled (Thailand) the Roman letter sequence *oe* should be written as a single letter: *Stœng Trêng; Kâmpóng Spœ*. Œ appears in this gazetteer as two separate letters only because of limitations inherent in the process of machine tabulation.

Designation.—The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which some of the designator terms are used and the range of features to which they are applied *in this gazetteer* are elaborated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named.

ADMD	first-order administrative division (*khêt*, municipality); second-order administrative division (*srŏk*)
AIRP	airport (place where aircraft regularly land and take off, with runways and major facilities for the commercial handling of passengers and cargo)
BAR	sandbar (deposit of water-borne materials in or beside a stream channel)
BAY	bay
BDG	bridge
CHNL	lake channel(s) (channel through a lake or connecting parts of a lake)
CHNM	marine channel (channel between coastal islands, reefs, or shoals; between an offshore feature and the mainland; or through a shallow marine waterbody)
CHNS	stream channel (separately named lesser channel around an island or bar in a stream)
CNL	canal
CRKT	tidal creek (watercourse tidal in all or most of its length; usually short, without extensive tributary drainage areas, and located in coastal marsh or other wetland)
DLTA	delta (land formed by the deposition of alluvium at the mouth of a stream, commonly in the form of a triangle or Greek letter *delta*)
ESTA	agricultural estate; plantation (commercialized, usually one-crop agricultural landholding with associated dwellings and other facilities, having unified ownership and management but requiring more than a single-family labor force)
GULF	gulf (large, broad waterbody indenting a coast)
HLL	hill (landform with moderate relief, moderate to low elevation, and small summit area)
HLLS	hills
ISL	island
ISLS	islands
ISLX	section of island
LGN	lagoon (waterbody along a coast, largely or wholly cut off from the sea by a barrier beach or other depositional feature)
LK	lake (includes wide sections of streams)
LKI	intermittent lake (seasonal waterbody which becomes a lake during periods of rain but which dries up or becomes a marsh or waterhole during the dry season)
LKS	lakes
LKX	section of lake
MRSH	marsh (wetland characterized by grasses or bush vegetation and few or no trees)
MT	mountain (landform with conspicuous relief, moderate to high elevation, and small summit area)

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

MTS	mountains, mountain range
PASS	pass (way over or between mountains or other elevated land)
PCLI	independent political entity (republic)
PGDA	pagoda
PK	peak (separately named summit on a larger elevation)
PLAT	plateau (elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level); (small area of flat to rolling surface in a well-dissected upland region)
PND	pond (small standing waterbody)
PNDI	intermittent pond
PNDS	ponds
PPL	populated place (city, town, village, settlement)
PPLQ	abandoned village
PPLX	section of populated place (part of a city or contiguous urbanized area named as an entity but having no known administrative status)
PT	point (minor projection of land, or its extremity, into a waterbody)
RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)
RF	reef (offshore consolidated rock hazard to navigation with a least depth of twenty meters, or ten fathoms, or less)
RGN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or a combination of conditions)
RKW	rock in water (individual rock of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named)
RPDS	rapids
RSTN	railroad station (building used for the transaction of railroad business, located beside a railroad track at a point where trains regularly stop to take on and discharge passengers or freight)
RSTP	railroad stop (place without a station building where trains stop for passengers or freight)
RSV	reservoir (large artificially impounded body of water)
RUIN	ruin(s) (structure in a state of ruin, but not necessarily of great antiquity or archeological interest)
SHOL	shoal (offshore hazard to navigation with a least depth of twenty meters, or ten fathoms or less, composed of unconsolidated material)
SPUR	spur (short sloping ridge extending laterally from a mountain or other elevation)
STM	stream (river or other running fresh waterbody, perennial in all or a part of its course)
STMA	anabranch (stream that leaves the main stream and rejoins it after following a separate course for a considerable distance)
STMD	distributary (secondary watercourse carrying part of the drainage of a larger stream into another waterbody; characteristic of deltas)
STMI	intermittent stream (stream, no part of which is indicated as perennial)
STMX	section of stream (separately named part of a continuous stream not necessarily delimited by significant confluences)
STRT	strait (relatively narrow water passage connecting large bodies of water)
VAL	valley (area drained by a stream, or a named segment of such an area)

Latitude and longitude.—The third and fourth columns list geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only. For precise location, large-scale maps should be used.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of points, and near the centers or midpoints of most other features.

Area number.—The number in the fifth column indicates the *khêt* (first-order administrative division) in which the place or feature is located. In addition to the twenty listed divisions, there

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

are six other entities described as "municipalities" with first-order status. Since the extent of the municipalities is uncertain, they have been combined for reference purposes with the *khêts* in which they are geographically located. The sources provide only generalized boundaries for the *khêts;* hence some of the numbers assigned to places and features herein may be inaccurate.

The general number (46800) is used for international features and for features in two or more first-order administrative divisions.

46800	Cambodia (general)	46809	Siĕmréab
46801	Kândal (includes Phnum Pénh municipality)	46810	Kâmpóng Thum
46802	Takèv	46811	Stĕng Trêng
46803	Kâmpôt (includes Bok Koŭ, Kèb and Kâmpóng Saôm municipalities)	46812	Rôtânôkiri
46804	Kâmpóng Spœ (includes Kirirôm municipality)	46813	Krâchéh
46805	Kaôh Kŏng	46814	Kâmpóng Cham
46806	Kâmpóng Chhnăng	46815	Prey Vêng
46807	Poŭthisât	46816	Svay Riĕng
46808	Bâtdâmbâng (includes Pailin)	46817	Môndól Kiri
		46818	Ôtdâr Méanchey
		46819	Preăh Vihéar
		46820	Tônlé Sab

Glossary of generic terms

The following terms appear in the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials, and do not necessarily reflect dictionary or other normalized usages. The parenthetical abbreviations (Ch), (Fr), (L), (M), (Th), (V) designate, respectively, Cham, French, Laotian, Malayan, Thai, and Vietnamese terms; the remainder are Khmer.

akas yéan dan ..... airport
baie (Fr) ..... bay
banc (Fr) ..... reef, shoal
bĕng ..... lake, intermittent lake, section of a lake, pond, intermittent pond, ponds, lagoon, marsh
châmkar ..... plantation
châmkar kausu ..... rubber plantation
châmnât akas yéan .... airport
chhâk ..... bay
chong (Th) ..... pass
chrâk phnum ..... pass
chroûy ..... point
chuŏr phnum ..... mountain, mountain range
houay (L) ..... stream
huai (Th) ..... stream
ia (Ch) ..... stream
ilot(s) (Fr) ..... island(s)
kaôh ..... island(s), section of an island, rock in water
khao (Th) ..... hill, mountain, peak
khêt ..... first-order administrative division
khlong (Th) ..... stream
khpóng réab ..... plateau
kinh (V) ..... marine channel, canal
o ..... stream, intermittent stream, distributary, tidal creek, lake
phanom (Th) ..... peak
phlov ..... pass
phnum ..... hill(s), mountain(s), ridge, peak
pointe (Fr) ..... point
poulo (M) ..... islands
prĕk ..... stream, intermittent stream, anabranch, section of a stream, tidal creek, canal, lake channel(s), bay
rạch (V) ..... stream, distributary
récif (Fr) ..... reef
roche (Fr) ..... rock in water
rocher (Fr) ..... rock in water, island
ruines (Fr) ..... ruins
spéan ..... bridge
srŏk ..... second-order administrative division
stĕng ..... stream, intermittent stream, anabranch, lake channel, lake

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

suối (V)	stream
tônlé	stream, anabranch, stream channel, lake
trâpeăng	pond, intermittent pond, reservoir, lake, intermittent lake
tuŏl	hill
véal	plain, plateau
vôtt	pagoda

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for future printings by reporting errors and name changes to the Board on Geographic Names, Department of the Interior, Washington, D.C. 20240. A statement of the source of the correct information will be helpful.

Geographic names or their spellings do not necessarily reflect recognition of the political status of an area by the United States Government.

TRANSLITERATION SYSTEM FOR CAMBODIAN
BGN/PCGN 1962 System

The BGN/PCGN 1962 System for the transliteration of Cambodian is basically the Modified Service Géographique Khmère (SGK) 1959 System, differing from the latter only in its treatment of the consonant-vowel combinations rœ̆, rœ, lœ̆, lœ, and in the addition of the Notes, these making the application of the system possible for those who have little or no knowledge of Cambodian.

This system has been devised without reference to the pronunciation of the language, from which the written form often differs greatly.

NOTES

1. In syllable-initial position, the consonants and clusters of the â-series, when otherwise unmodified, are transcribed with the vowel â following. Thus: kâ. Under the same conditions, the consonants and clusters of the ô-series are transcribed with the vowel ô following. Thus: kô. In syllable-final position, unmodified consonants are not vocalized. Thus: kâk.

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

2. The symbol x represents any consonant. In the case of the column illustrating the vowels of the â-series, x represents only consonants of the â-series, whereas in the case of the column illustrating the vowels of the ô-series, x represents only consonants of the ô-series.

3. To supply the missing independent forms of the vowels of the â-series, the dependent vowel-symbols are written in conjunction with the 'vowel bearer', . The 'vowel bearer' itself is not shown in transcription. Thus: â; a; ei. To supply the independent forms of the vowels of the ô-series, the dependent vowel-symbols are written in conjunction with the 'vowel bearer', modified by means of the symbol placed above it. When this would conflict with another superscribed symbol, the symbol is substituted, placed below the 'vowel bearer.' Thus: ô; éa; i.

4. The symbol written over a consonant of the â-series changes it to the ô-series. Thus: hô. The symbol written over a consonant of the ô-series changes it to the â-series. Thus: nhâ. When these symbols would conflict with another superscribed symbol, the symbol is substituted, placed below the consonant. Thus: hi; yei.

5. The symbol is also written above the symbol to produce the consonant p in the â-series. Thus: pâ. The symbol is also here substituted in cases where a conflict would result. Thus: pĕ. In the case of the cluster pr in the â-series, the diacritic mark is not used. Thus: prâ, not brâ.

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

6. The combination of ប plus ា is written ប្ big ba, to prevent confusion with ហ h (hâ).

7. The second consonant of a cluster is written, often in special form (called a 'foot'), below the first consonant. Thus: ក្ខ kméng.

8. The 'foot' ្ t is transcribed as d when it occurs with ណ. Thus: ក្ត Kta, but ក្ណ Kândal.

9. When a syllable begins with a cluster, the series of the vowel is determined by the initial consonant, except when the 'foot' is a stop (b, ch, chh, d, k, kh, p, ph, t, th), in which case the 'foot' determines the vowel series. Thus: ក្រ krâ; ក្ខ ktông.

10. When the 'vowel bearer' occurs with a 'foot', or as a 'foot', it is transcribed by means of the apostrophe. Thus: ឡ 'vei; ផ្ទ Ph'âr; ក្ក K'êk; ម្ម M'âm.

11. When a syllable ends in a cluster, the last element is not vocalized. Thus: អង្ក Ângk; វត្ត vôtt; ពុទ្ធ Pŭtth.

12. The symbol ្ forms a cluster of r plus the consonant over which it is written. Thus: ធ្ម thôrm.

13. The symbol ់ occurs only in the combinations ្ក and ្ច. Its effect is to shorten the preceding vowel. It is represented in transcription by the acute accent in the case of the shortened â and ô, otherwise by the breve, written over the affected vowel. Thus: អស់ ás; ម្ចាស់ mchăs; ខ្ពស់ khpós; រមៀត Rôpeăk.

14. The symbol ៑ occurs only in the combination ្ច, and has the same effect as ្ច. Thus: ធ្ម្ចេ Thômmteăy; ធ្ងន់ Tărôt.

15. The symbol ៎ is disregarded in transcription. Thus: ប្រយោជ៎ន៍ prâyoŭchôn.

16. The symbol ៏ is also disregarded in transcription.

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

RECENT MODIFICATIONS TO THE BGN/PCGN
1962 SYSTEM FOR CAMBODIAN (KHMER)

1. The graphic cluster ᩅ is romanized [hv].
2. The 'foot' ᩋ is romanized either [d] or [t].
3. The graphic combinations ᩁᩥᩋ and ᩋᩣᩋ are romanized [eă] when followed by [k], [ng], or [h], elsewhere [oă].
4. The independent character ᩌ is romanized either [ŏ] or [ŭ].

Khmer writing, like English, is read from left to right. In the absence of guidance from a native Khmer speaker, the following reference works may be helpful in romanization:

Guesdon, J., Dictionnaire cambodgien-français, Les Petits-Fils de Plon et Nourrit, Paris, 1930. (Two volumes)

Tandart, S., Dictionnaire cambodgien-français, Im. A. Portail, Phnom Penh, 1935. (Two volumes)

Dictionnaire cambodgien, Institut Bouddhique, Phnom Penh, 1951. (Two volumes, entirely in Khmer)

APPROVED FOR RELEASE: 2007/02/20: CIA-RDP01-00707R000200040002-1

Created in 1849, the Department of the Interior—America's Department of Natural Resources—is concerned with the management, conservation, and development of the Nation's water, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs and for standardization of Federal usage of both domestic and foreign geographic names.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States—now and in the future.
