Welcome to the Adobe® Photoshop® Application CD-ROM
Please take a minute to read this important information.

_____

ADOBE PHOTOSHOP 7.0 INFORMATION
For information on system requirements, installing, and launching Adobe Photoshop 7.0, please read the Install Read Me located at the main level of this CD.

After you install Adobe Photoshop 7.0, please refer to the Read Me file located in the Adobe® Photoshop® 7.0 application folder. The Read Me file contains important last-minute information. You may want to print it and keep it with your manuals for reference.

For your convenience, a PDF version of the User Guide and Quick Reference Card are included on this CD.

For an in-depth overview of new features in Adobe Photoshop 7.0, have a look at the New Feature Highlights.pdf in the Adobe Technical Info folder. In the same folder, the At A Glance.pdf is a brief, two-page overview of new features.

ADOBE ACROBAT® READER 5.05
Adobe Acrobat Reader software lets you view and print Portable Document Format (PDF) files. You can install the Adobe Acrobat Reader 5.05 software by double-clicking the reader installer in the Adobe Acrobat® Reader 5.05 folder.

GOODIES
Don't pass by the Goodies folder without having a look inside! This folder contains a variety of useful items including textures, color swatches, channel mixer presets, printer drivers, optional plug-ins and extensions.

STOCK ART _(not available on Educational versions)_
103 professional stock photographs are included for your use in the Stock Art folder located inside the Goodies folder. You may preview thumbnails of these images by double-clicking on Stock Art Catalog.pdf, also located in the Stock Art folder. Use of these images is governed by the Adobe Photoshop 7.0 End User License Agreement.

To use the stock art files, open them from within Adobe Photoshop 7.0. These files have been saved using JPEG compression at the highest quality. To preserve maximum image quality, save them in Photoshop format. Repeated compression using JPEG can degrade image quality.

THIRD PARTY PRODUCTS

Each folder contains software plug-in modules and/or demonstrations from third parties. Adobe does not certify compatibility or provide support for these plug-ins and demonstrations.

For more information about Adobe products and how to purchase them, visit the Adobe Web site at http://www.adobe.com, or call 1-800-833-6687 within the U.S and Canada. Outside North America call your local Adobe authorized distributor.
