Subject: Soviet Air Order of Battle

25X1

1. On 21 June 1946, at the railroad station at Bruck a. d. Leitha, a freight train of forty box cars was observed standing on a side track. The cars contained approximately 500 Daimler-Benz motors, type #603, used by the Luftwaffe in the ME-410.

2. On the same day, a Soviet formation consisting of eighty MY-110's and sixty-eight MY-410's was observed over the nearby airport.

3. The airport has three concrete runways, each approximately 800 meters in length, and six hangars, the two largest of which are about 80 meters long and 50 meters wide. The sliding hanger doors are 9 meters high; the total height of the hangars is approximately 15 meters.
