1 December 1981

NOTE FOR: EA/D/NFAC
EXO/NIC

FROM : Special Assistant to the DDCI

The DDCI will be meeting with Senator Quayle on Thursday, 3 December, at 2:00. In preparation for this meeting, the DDCI needs some current talking points on the following subjects:

-- Soviet developments in chemical and biological warfare

-- NATO; assessment of European politics and the impact of the following three separate issues:

a. INF discussions with the Soviets

b. The fragility of the NATO alliance

c. Overall U.S. defense policy

As a starting point, I propose that subject 1 be no longer than one page and that subject 2 (NATO) be in the range of one to two pages. I need this information for the DDCI no later than 11:00 on 3 December, and I would prefer to get it by 1730 on 2 December. I know this is a rush job, but please do the best you can. Each of these answers should be coordinated between NFAC and NIC.

If there is anything I can do to assist you, please let me know.
