FOREWORD

This gazetteer contains about 23,700 entries for places and features in Bulgaria. The entries include approved standard names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous lists compiled by the Board on Geographic Names for the area.

The gazetteer includes the names of all populated places listed in the 1956 census of Bulgaria. Administrative-division names reflect internal administrative changes through April 10, 1959. Physical features shown on maps at the scale of 1:400,000 are also included.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the nonunderlined part is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names that include specific and other elements (except names of populated places) are alphabetized by specific part; thus Nos Agalina is listed as Agalina, Nos. The diacritical marks used in the Board's transliteration of Bulgarian names are the breve, as in Okrŭg, and the apostrophe, as in Bal'ovtsi. They are to be used whether the names are written in capitals or lower-case letters.

Designation.—The second column contains designations or abbreviations of designations, as follows:

The code 38200 is used for physical features and for cross-references.

Locational reference.—The number in the last column indicates a source on which the feature may be located by its standard name or a recognizable variant of its standard name, as follows:

01 *Bulgarien 1:100,000: Deutsche Heereskarte,* Generalstab des Heeres, 1939–44, or *Bulgaria 1:100,000,* AMS M609, Army Map Service, Washington, 1953–54, a reproduction of the German set. (Names are in the Bulgarian and Roman alphabets.)

Many of the administrative divisions by which places are located in this census have been superseded, as indicated by the Administrative Division column in this gazetteer.

The code 00 is used for cross-references and for the standard names to be found only on references other than those listed above. See the transliteration table at the end of this Foreword, for aid in the use of maps and lists for Bulgaria.
