INTRODUCTION

This gazetteer contains about 20,800 entries for places and features in two lists: Kingdom of Saudi Arabia (20,670) and the Iraq-Saudi Arabia Neutral Zone (130). The reported division of the neutral zone between Iraq and Saudi Arabia had not been ratified by these two countries at the time of completion of research for this publication in April 1977.

The names in this gazetteer supsersede those in all previous Board lists for the area.

The entries include standard names approved by the U.S. Board on Geographic Names (BGN) and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The basic name coverage corresponds to that of maps at the scales of 1:500,000, 1:250,000, and larger scales in selected areas. Entries include the names of first-order administrative divisions, populated places of different sizes, various other cultural entities, and a variety of topographic and hydrographic features.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one or more of the following sources:

1. *Joint Operations Graphic (G) 1:250,000,* D. Survey or Director of Military Survey (U.K.); Army Map Service, U.S. Army Topographic Command, Defense Mapping Agency Topographic Center, 1966–1976. [Partial coverage.]

2. *Arabian Peninsula 1:500,000* (Series K462), AMS (from Miscellaneous Geologic Investigations, 1:500,000, USGS), 1963. [English and Arabic.]

3. *Arabian Peninsula 1:2,000,000,* U.S. Geological Survey, 1963.

4. *Kingdom of Saudi Arabia, Mineral Locality Map of the Arabian Shield 1:2,000,000,* Ministry of Petroleum and Mineral Resources, Directorate General of Mineral Resources, Saudi Arabia, 1974. [English and Arabic.]

5. *Kingdom of Saudi Arabia,* Ministry of Petroleum and Mineral Resources, Directorate General of Mineral Resources, Saudi Arabia, 1967–75. [A selection of 37 sheets covering portions of central and western Saudi Arabia, titled "Geologic Map" and "Mineral Investigations Map." Most are scaled at 1:100,000, with a few sheets at 1:10,000, 1:25,000, and 1:250,000.]

6. British Admiralty charts, Hydrographic Department, Great Britain, [various dates and scales.]

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in this gazetteer in order to accommodate it to machine tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus *Jaww ad Dukhān,* the name of a depression, is listed as *Dukhān, Jaww ad.* Where part of a name is underlined, the use of the part not underlined is optional. If two or more names are approved for a feature, each is identified in parentheses and any or all may be used.

Language labels are used to identify alternate local names of noninternational features. Local names of international features are identified by major-political-entity labels. If only one country is identified parenthetically, no name is available for the feature in the other country. The following short forms for names of countries contiguous to Saudi Arabia are used in this gazetteer where it is necessary to indicate the sovereignty of international names:

Yemen (Sana)	[Yemen Arab Republic]
Yemen (Aden)	[Peoples Democratic Republic of Yemen]
U.A.E.	[United Arab Emirates]

As far as possible, Arabic names in this gazetteer have been romanized from Arabic script according to the transliteration system used jointly by the Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use (the BGN/PCGN 1956 System, [Revised in 1972]), which follows on pages xi through xvi. It is almost always necessary to add missing symbols for short vowels (vowel points) in Arabic script and to rewrite dialectal forms in standard written Arabic. Names found written only in roman letters but recognizable as Arabic have been reconstructed into Arabic script and then transliterated.

In a few cases, in which it was not possible to determine complete BGN/PCGN Arabic forms, names have been given in the form found in romanized sources and marked with an asterisk (*) preceding the designation; however, individual Arabic words recognizable in these names have been rendered in the system.

The diacritical marks used in approved Arabic names in the areas covered by this gazetteer are the macron (¯), the cedilla (¸), and the acute accent (´). These marks are to be used whether the names are written in capital or lowercase letters. In addition, the apostrophe (') and the inverted apostrophe (ʿ), representing the letters *hamzah* and *'ayn*, respectively, frequently occur in Arabic names.

In writing Arabic names in capital and lowercase letters, every word in a name should be initially capitalized except the following when they are not name-initial: *wa* (and) and the definite article *aḍ, ad, adh, al, an, ar, as, aṣ, ash, at, aṭ, ath, az*, and *aẓ*. The word *Āl* (with a macron), which should not be confused with the definite article, should always begin with a capital letter.

Designation.—The second column contains designations or abbreviations of designations, as listed below. Because practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied *in this gazetteer* are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. Some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

TRANSLITERATION SYSTEM FOR ARABIC GEOGRAPHIC NAMES

BGN/PCGN 1956 System (Revised in 1972)

The BGN/PCGN 1956 System for the Arabic alphabet is designed for use in transliterating standard written Arabic. It was adopted by the BGN in 1946 and by the PCGN in 1956 and has been applied by the Board, so far as practicable, to the systematic romanization of geographic names in Syria, Lebanon, Jordan, Iraq, the Arabian Peninsula, the United Arab Republic (Egypt), Libya, the Sudan, and Tunisia.

The system is designed to bring about uniformity in the spelling of geographic names in Arabic-language areas by eliminating deviations resulting from pronunciation differences in various dialects, except as stated in the special rules.

In contrast to several other languages, uniform results in the transliteration of Arabic are difficult to obtain, since vowel points and some of the diacritical marks necessary for the certain identification of the Arabic words are almost always omitted from both handwritten and printed Arabic. It follows that the transliterator must be able to identify the words used in the names and must know their standard written Arabic spelling, their proper vowel pointing, and how to eliminate pecularities resulting from dialectical variation. The problem is complicated in most Arabic-language areas by the fact that a large proportion of the geographic names are not available in the Arabic alphabet. This applies to Arabic names as well as to those of non-Arabic origin. Even when Arabic script is available it is not always possible to determine the proper voweling from dictionaries and other reference tools.

The transliteration of the Arabic consonants, vowels, and dipthongs, with examples of the application to geographic names, is given in the tables. *Hamzah*, often omitted in such tables, is included in its logical position before *alif* as a consonant in order to avoid any question as to its proper treatment.

The notes and special rules explain details of transliteration not stated in the tables.

NOTES

1. *Hamzah* is written in Arabic over all initial *alifs* except those which belong to the definite article *al* or bear a *maddah* (see note 10). When the purpose is to indicate the presence of the sound described as a glottal stop, it is written over internal and final *alif*, *wāw*, and *yā'* (without dots). *Hamzah* following i is written ئ (almost always the *yā'* is in the ـيـ or ـيـ form) and the dots are omitted. Example: بئر. *Hamzah* following u is written ؤ. *Hamzah* following a long vowel is written ء without anything under it ("without a bearer"). The transliteration of *hamzah* (') should always be carefully distinguished from that of *'ayn* (').

2. *Alif* as such is not transliterated when it is bearer of *hamzah*, but see *fatḥah alif* and *alif maddah* in Table II. See also note 1 above and note 10.

3. An original *tā'* in certain endings is written ة (i.e., *hā'* with two dots) and is called *tā' marbūṭah*. It is transliterated h (silent), except when followed by another word in a unitary expression, when it is transliterated t, as in *hamzah* (isolated form) and *hamzat al waṣl*. A pronounced final *hā'* occurs and for bibliographical purposes may be transliterated /h when a *fatḥah* precedes it (Al Mara/h). Cf. also note 4.

4. The two-letter symbols th, kh, dh, sh, and gh are convenient for use and easily comprehensible. The infrequent sequences of t, k, d, or s followed by h can be unequivocally transliterated for bibliographical purposes by the use of a slant line ("shilling," "solidus") to separate true h from a preceding t, k, d, or s; that is, th represents *thā'*, but t/h stands for *tā'* followed by *hā'*. Cf. also note 3.

APPROVED FOR RELEASE: 2007/02/09: CIA-RDP01-00707R000100160010-0

5. Where special considerations are paramount, the sub-dot (ḥ, ṣ, ḍ, ṭ, ẓ) may be used in place of the cedilla (ḫ, ş, ḑ, ţ, ẕ).

6. The letter *yā'* is also used in writing *alif maqṣūrah* in which the dots are omitted. See Table II.

NOTES

7. The classical Arabic grammatical endings written with the so-called nunation symbols (Arabic *tanwīn)* may be transliterated when necessary by a^n, i^n, u^n. In modern Arabic these endings have become silent and are omitted in transliteration: classical *alifu*^{n}, modern *alif.*

8. Doubled consonant sounds are written in Arabic by placing the *tashdīd* over the consonant letter written once. In transliteration the letter should be doubled. When the definite article *al* precedes a word beginning with t, th, d, dh, r, s, sh, ṣ, ḍ, ṭ, ẓ, l, n (the so-called "sun letters"), the l is assimilated in pronunciation, giving tt, thth, etc. In transliteration this l should be omitted and the following letter written twice, once after the a of the article and secondly at the beginning of the next word. Example: An Nīl, not Al Nīl.

9. *Hamzat al waṣl* is transliterated ' in classical forms, as illustrated in its classical name *hamzatu 'l waṣli,* but ignored in modern forms, as in *hamzat al waṣl.*

10. *Maddah* is a horizontal wavy line over *alif.* Since *maddah* nearly always occurs in word-initial position, no confusion results from the use of ā for *alif maddah* as well as for *fatḥah alif.*

SPECIAL RULES

The following notes explain details of transliteration not stated above.

1. Initial definite articles and prepositions should be capitalized and hyphens should not be used to connect parts of names; e.g., Ash Shāriqah and Tall al Laḥm.
2. If any evidence is found for the use of the definite article in a name, the article will be used in the name chosen.
3. The Arabic word for God will be written Allāh.
4. Phrase names, commonly transcribed as one word, will be written in separate words. The definite article within such names will be written al, not ul; e.g., ʿAbd Allāh, ʿAbd ar Raḥmān, Dhū al Faqār.
5. The word Ibn will be transliterated Bin wherever written without *alif,* that is, between two proper nouns; e.g., ʿUmar Bin al Khaṭṭāb.
6. The Turkish word Paşa will be transliterated directly from Arabic script as Bāshā; the Turkish word Bey will be romanized as Bey in Egyptian names, no matter how written in Arabic-language sources, but in other Arabic areas as Bak where written *bā'–kāf* and as Bayk where written *bā'–yā'–kāf.*
7. The modern colloquial word Sīdī will be given precedence over the classical form Sayyidī. (This does not preclude the spelling Sayyidī if the latter is indicated by the Arabic script or other evidence – for instance if the *yā'* is written with *tashdīd.)*
8. The colloquial word Bū will not be changed to the classical form Abū.
9. The colloquial word for water written *mīm–yā'–tā'* on Arabic maps will be transliterated Mayyat.
10. In place names of Aramaic origin in Lebanon and Syria with an initial cluster beginning with b plus another consonant such as l or h, initial clusters such as bl and bh will be written.
11. In names containing the words for "back, ridge, hill" appearing as either *ẓā'–hā'–rā'* or *ḍād–hā'–rā'* in Arabic sources, the spelling used in the sources will be followed.
