Caution - don't touch the three letters - take care - we do not tolerate any terrorism - considering the common national interest we are silent - don't force us to speak - we warn you and your followers against provocations and threatenings - besides this be cautious as to anonymous threatenings directed to the address of single persons. We acknowledge the principles of Ukrainian morality and charity - we are waiting - and we warn you against the case of sharpening conditions - we accept the general responsibility Stop - perhaps authorities will be innocent. - All organized provocations - will be accepted as a challenge - we shall accept them as a consequence of the provoked events - the responsibility must be born by you and your followers - every further provocation will be followed by a regardless reaction - this warning will be the first and the last one - in future we shall act without any warning and without any discussion - some citizens will remember their past - and their future - perhaps they will recover their senses and will hinder further provocations Caution - we know quite a lot - we shall not begin to strike as the first - we don't tolerate any terrorism Don't Touch the three letters this will be of your own interest.
