This volume of the Preliminary Gazetteer for Algeria is issued as part of the National Intelligence Survey program and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area. For features lying within adjacent areas, refer to appropriate Gazetteer.

This Gazetteer is issued on a preliminary basis to expedite availability of this work material for use in the preparation of the National Intelligence Surveys. It is contemplated that major additions and revisions will be published in supplemental volumes and that subsequently the material will be consolidated and published as a standard component of the National Intelligence Survey for Algeria.

Distribution of this publication is made by the Central Intelligence Agency. This document carries a RESTRICTED classification but individual names thereof are unclassified.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information regarding places and features listed in the gazetteer in order to accommodate it to the machine method of tabulation.

Name.--Standard names and cross-references from variant names appear in the first column. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Where part of a name is underlined, the use of the nonunderlined part is optional. Names that include both specific and generic elements (except names of populated places) are alphabetized by the specific part; thus Hassi el Aamira, a well, is listed as Aamira, Hassi el.

Designation.--Designations are often difficult to determine because of the character of the area and the sources. In the second column,
