SOVIET BLOC OPERATIONS PERIODIC REPORT

1 October 1972 - 30 April 1973

TARGET PRESENCE

1. ⁵ geographic area of responsibility is the State of North-Rhein Westphalia and portions of Lower Saxony. Target installations located within this area include:

a. Soviet

1) Soviet Embassy, Rolandseck near Bonn. Staff of 92 plus working wives. Thirty-five officers are known or suspect RIS.

2) Soviet Trade Mission, Cologne. Staff of eighty plus working wives. Thirty-four officers are known or suspect RIS.

3) "Soviet Union Today"/Novosti, Cologne. Staff of five Soviets plus ten indigenous employees, latter all believed to be members of the German Communist Party.

4) TASS, Bonn. Staff of four correspondents and five clericals.

5) Inturist, Cologne. Staff of two.

6) Other Journalists. Eleven Soviet correspondents for various publications work from their homes in Bonn.

7) Miscellaneous. Between sixty and one-hundred acceptance engineers, teachers, visiting professors, etc., are in the BOU area on TDYs of various length during a typical reporting period.

b. Soviet Bloc.

1) Polish Embassy and Trade Mission, co-located in Cologne. Staff of seventy-five.

S E C R E T
R Y B A T

E2, IMPDET

S E C R E T
R Y B A T

- 2 -

- 2) Romanian Embassy and Trade Mission, co-located in Cologne. Staff of sixty.
- 3) Yugoslav Embassy, Bonn. Staff of sixty.
- 4) Hungarian Trade Mission, Cologne. Staff of sixty.
- 5) Bulgarian Trade Mission, Bonn. Opened 2 April 1973. Anticipated staff of twenty-five.
- 6) Bloc Journalists. Nineteen correspondents representing various Polish, Hungarian, Bulgarian, Yugoslav, and Czech media outlets are based in Bonn.

CHANGES IN TARGET PRESENCE

2. Several Soviet Embassy staffers transferred to Hamburg during reporting period as cadre for the Soviet Consulate General established in that city in October-November 1972. The Soviet Embassy gained five additional slots (on a reciprocal basis with the German Embassy in Moscow.) The Polish Embassy in Cologne was opened in November 1972. These changes were direct results of the so-called Ostpolitik of the BRANDT government. On 2 April 1973, the Bulgarian Trade Mission was established in Bonn. It is still in the process of being organized.

TARGET ACTIVITY

3. Covert Activity. Glimpses into Soviet covert activities gleaned directly through [] operational efforts or indirectly through CAWHISPER, indicate heavy emphasis on the West German internal target and only moderate interest in WODUAL or other third-country nationals residing and working here. The PDQUICK Residentura is apparently organized on a functional basis. Referents are assigned to work against specific target groups, such as the major political parties, but individual case officers do not seem to be limited to working only against their referential targets. (For example, the Deputy PDQUICK Resident specializes in the Christian Democratic Party, but also has at least one important Social Democratic Party contact.) We have less

S E C R E T
R Y B A T

S E C R E T
R Y B A T

- 3 -

information about the organization of the PDGRAVE Residentura. We believe it is significantly smaller than one would expect to find in a comparable embassy elsewhere simply because of the existence in the Federal Republic of Germany of three Identity As, each of which is totally staffed by PDGRAVE officers. (The post-war developments in Germany, including the partition of the country into four zones of occupation, the establishment of Identity A in the Western zones, the partition of Berlin and the establishment of the large Soviet intelligence complex in the East Berlin Karlshorst Compound, all resulted in an unorthodox organization of the PDQUICK and PDGRAVE presences which persists today and which complicates analysis of the respective Residenturas.)

4. Overt Activity. There is no Military Attache Staff at the Soviet Embassy. The Embassy is otherwise structured in a normal pattern with a large Political Section, a large Consulate, and smaller Cultural, Scientific and Technical, Economic, Press and Information, and Agricultural Sections plus a complement of administrative and support personnel. The Embassy collects political information aggressively and appears to have excellent contact with the Federal Chancellery, with the important ministries, and with the two political parties in the governmental coalition. (It does not neglect the opposition, but appears to find it less receptive.) Embassy image and impact are keyed by an able ambassador and augmented by TDY visits of high-powered personalities and delegations. The Embassy is deeply involved in promoting a cultural exchange program heavily weighted toward staging events throughout the Federal Republic. It pays scant attention to helping organize reciprocal programs in the Soviet Union. Most Embassy officers travel on the lecture circuit, usually in pairs. Sponsors of these lectures are expected to furnish a generally friendly audience, but the Embassy officers are well-briefed and are unafraid of tackling touchy, if not hostile, questions from the audience. The Trade Mission is organized to represent all Soviet state trading corporations. Some state trading corporations are represented by more than one officer, while other officers represent several of the smaller trading corporations. Since virtually all contractual negotiations are handled in Moscow, the Trade Mission functions more as a transmission belt or informational exchange facility than as a commercial office. Inasmuch as the Federal Republic is the Soviet Union's principal Western trading partner, this role keeps most STM officers busy and most travel frequently and widely. (Conversely, some STM officers engage in no overt

S E C R E T
R Y B A T

S E C R E T
R Y B A T

- 4 -

activities, strongly indicating they have only intelligence functions.

[] OPERATIONAL ACTIVITY

5. Direct Staff Officer Contact. Ten [] officers were in direct staff officer contact with Soviet and/or Soviet Bloc targets during reporting period. []

[] whose covers provide each legitimate and regular contact with target personalities, spearheaded this operational effort. One case officer was in alias contact with a [] primary Soviet target. The remaining seven officers were in true-name contact using their various LNLUE covers. The most promising direct contact operation involved [] [] case officer [] who is in alias contact with AETOWHEE as an Austrian businessman (see Attachment 1).

6. Agent Activity. [] uses agents and cooperative collaborators for both access and tracking roles against the Soviet target. Most of these assets are included in and funded by the CATOMIC Project. Twenty-four such assets were in contact with Soviet/Soviet Bloc targets during reporting period. Twelve of these assets were salaried and twelve were unsalaried. Ten of the twelve salaried assets were in multiple contact, that is, in contact with more than one Soviet and/or Bloc target personality. Some were in touch with several such target personalities. Six of the twelve unsalaried assets were in multiple contact. Twelve [] assets performed tracking roles during reporting period. Eight of the trackers were salaried, and four were unsalaried, accepting only remuneration for operational expenses. Seven [] assets were OP/LP keepers or innkeepers, the latter reporting on target personalities frequenting their establishments. Three of these assets were salaried, and four were unsalaried. Four CATOMIC assets had no contact with Soviets and/or Bloc target personalities during reporting period. Two were in multiple contact with MPCHEEK personalities; one was in contact with MPCHEEK and LHDEN personalities; and, one was unable to make meaningful contact with any target personalities during reporting period. Twenty-five CATOMIC assets have been dropped, five during reporting period. See Attachments 3 and 4 for functional breakdowns of the Soviet Embassy and the Soviet Trade Mission showing which [] assets are in contact with which Soviets.

S E C R E T
R Y B A T

S E C R E T
R Y B A T

- 5 -

7. Operational Support. A number of other operational support tools are available to [] These include:

a. Teletap Coverage. CAWHISPER and CASCOPE provide telephone tap coverage of the main switchboard lines into the Soviet Embassy, the Soviet Trade Mission, and the offices of "Soviet Union Today". A number of other lines are covered, including several into the Embassy residential highrise apartment building, the Soviet Trade Mission residential highrise building, and the apartment of primary target AERAM.

b. Audio Operations. [] has active audio operations against the apartments of AETOWHEE (mike and wire) and AEWARBLER (RF).

c. Surveillance. [] has four transceiver-equipped surveillance sedans plus one surveillance van in which a portable transceiver can be installed. [] has six GE portomobile transceivers for OP and rental car use and two Kel-com transceivers for body wear. All [] officers and clerical personnel are surveillance-trained. All perform surveillance on a rotational basis.

d. Fixed Observation. [] has a closed circuit TV-equipped OP/photopoint with live-in OP keeper opposite the Soviet Embassy residential highrise. There is an OP/photopoint opposite the Soviet Trade Mission residential highrise for which an OP keeper has not yet been located. CAWHISPER maintains OP/photopoints opposite the Soviet Embassy and the Soviet Trade Mission. [] obtains and passes on to [] the "take" from these installations.

e. Record Checks. Several case officers and tracking assets are documented for and experienced in making Einwohnermeldeamt and Adrema (registration and residence) checks, automobile license checks, police file checks, etc. Case officers handle the more sensitive checks of this nature.

f. Liaison. [] is responsible for contact with CAWHISPER and CASCOPE.

S E C R E T
R Y B A T

S E C R E T
R Y B A T

- 6 -

OPERATIONAL PRODUCTION

8. The operational program against the [] Soviet Bloc target is aimed at the recruitment of human sources. Disseminable intelligence information is, nevertheless, obtained as a by-product of this effort. During reporting period, eighteen intelligence reports were disseminated, most bearing upon West German-Soviet or West German-Soviet Bloc relations. Four reports were evaluated V; six were evaluated I; three were commented upon by the Soviet Bloc Division and not graded by European Division; and, grades are outstanding on five. Highlighting the list were EGX-432 -- Soviet Desire for Early Agreement with the FRG on Uses of Nuclear Energy; and, EGX-461 -- Discussions of Agenda Items for FRG/USSR Mixed Commission for Economic Cooperation.

STAFF RESOURCES COMMITTED TO SOVIET EFFORT

9. All personnel assigned to [] are involved in Soviet Bloc operations. Four case officers are SB home-based. Two of the SB officers are [], but devote virtually all their non-supervisory time to Soviet Bloc operations. A third SB officer is handling a sensitive LH DEN operation and otherwise devotes a large amount of time to Soviet Bloc operations. The fourth SB officer handles an important NE operation, but is otherwise largely employed on Soviet operations. The degree of involvement of the remaining case officers assigned to [] ranges from minimal to substantial. Assigning an arbitrary percentage to the amount of time each case officer devotes to Soviet Bloc operations and averaging the results indicates that twenty-one officers devote an average of 32 per cent of their time to Soviet-Soviet Bloc operations for an annual rate of seven man-years. In addition, three AESCREEN transcribers and two intelligence analysts work full time on the Soviet-Soviet Bloc target.

COSTS

10. Expenditures for the [] Soviet operations program are currently running at an annual rate of approximately []

Attachment 1

BOU PRIMARY SOVIET TARGETS

CURRENT PRIMARY TARGETS

1. AECLEF. This 47-year old possible PDGRAVE officer arrived in Bonn in April 1972 to fill a newly created slot as liaison officer to CAEVIL. One of his first contacts in Bonn was CATOMIC/47, a realtor who found him an apartment in a three-family home here. CATOMIC/47 rented the apartment directly below AECLEF's to [] and we installed CATOMIC/62 and his wife, CATOMIC/64, in it. A neighborly relationship soon developed and intensified when CATOMIC/62 entertained AECLEF several times during AECLEF's wife's recent long vacation in CKPOLAR. AECLEF apparently has little or no mechanical aptitude, whereas CATOMIC/62 is an electrical engineer and amateur radio ham. As a result, AECLEF regularly calls upon CATOMIC/62 to help him make minor repairs to his record player, television, etc. CABAFFLE also knows AECLEF through CAEVIL activities. CAFISSION has provided considerable insight into AECLEF and his activities. In addition to CAEVIL, AECLEF is involved in arranging cultural exchanges via Identity B. CATOMIC/15 and CATOMIC/57 are members of this organization. It is organizing a cultural week in mid-May which AECLEF is helping organize. In addition to CATOMIC/15 and CATOMIC/57, CATOMIC/8, CATOMIC/14, and CATOMIC/35 will attend. CATOMIC/62 will ask AECLEF for tickets for himself and CATOMIC/64. With luck, some of these assets may run into AECLEF at one of the events. Meanwhile, CATOMIC/37 has been given a list of AECLEF contacts and is investigating them through pretext telephone calls. For an operational summary, see EGXA-2150, 15 March 1973. [] [] is AECLEF Task Force Chief. Members include [] and []

2. AERAM. This 35-year old ~~probable~~ PDQUICK officer was [] primary target prior to his transfer to the Bonn area in September 1972. CATOMIC/47 rented him his local apartment and rented [] another small apartment in the same building. CATOMIC/47 is presently in occasional contact with AERAM in connection with attempts to locate an apartment for Identity I. CATOMIC/6, CATOMIC/33, CATOMIC/50 and [] also know him, running into him regularly at various press conferences and functions sponsored

S E C R E T
R Y B A T

S E C R E T
R Y B A T

- 2 -

by Identity C. CATOMIC/6 obtains further information about AERAM indirectly from AETOWHEE. CAFISSION coverage of AERAM's home provides insights into both the AERAM and AESKIMMER families, which are close. AERAM's closest friend in Frankfurt is AESPICE, and [] audio coverage of the AESPICE apartment gives us additional interesting insights. Operational summary being pouched via EGXA-2258. [] is Chief of the AERAM Task Force. Members include [] and []

3. AECAPRI. This 27-year old, first-tour Identity D correspondent arrived in Bonn in November 1971. We increasingly suspect him of RIS affiliation, probably PDQUICK. Per AETOWHEE, he is the son of a deputy minister, although we cannot confirm this. [] has met AECAPRI on several occasions at Identity C functions and spent considerable time with him on an Identity C field trip to Hannover in April 1972. CATOMIC/33 was on the same field trip. He also meets him at other Identity C functions as well as at frequent "PR" parties held by Lufthansa for the press which both men attend. CATOMIC/50 met AECAPRI at such a party in February 1973. She felt there was real contact, and that she will have no problem getting to know him better. CATOMIC/6 has met AECAPRI at press functions. Her instinctive reactions to people have proven rather reliable in the past, and in the case of AECAPRI, imagines he is quite a sensuous man who would have trouble disciplining himself if he were tempted by an attractive female. "AECAPRI looks like a potent chap; he looks like he loves sex and has not had enough of it and is curious to have more. I feel he is like a wild young animal." CATOMIC/6 subsequently learned from AETOWHEE that AECAPRI has a roving eye for the ladies. [] in alias posing as a "swinging bachelor" has met AECAPRI. He met him through Identity E, a free-lance journalist currently sweating out the last days of his inducted service with the West German Army. The three men recently spent an afternoon bowling together and made plans for several other encounters. Meantime, [] introduced [] Identity E to add another possible dimension to the manipulation of AECAPRI. [] met AECAPRI briefly at a pre-Lenten carnival ball. CATOMIC/67 has been tasked to make a series of pretext interviews in the AECAPRI apartment building. We are primarily interested in a third-world diplomat who lives directly below AECAPRI. His apartment would make an ideal LP for a mike-and-wire audio operation against this target. Once we have obtained a preliminary reading on the diplomat, we hope to

S E C R E T
R Y B A T

S E C R E T
R Y B A T

- 3 -

call upon [] who specializes in the recruitment of this particular nationality, for assistance. See EGXA-2208, 3 April 1973, for operational status report. [] is Task Force Chief.

Members include [] and []

TARGETS OF OPPORTUNITY

1. AETOWHEE. Manipulation of this 43-year old Identity-F continues to be instructive for [] The major development during reporting period was the introduction to AETOWHEE of

[] The two have become deeply involved in a number of bogus publishing schemes and have spent long hours drinking together in AETOWHEE's apartment, during which time considerable, apparently deeply felt, friendship or "Druzhiba" has developed between the two men. AETOWHEE has edited several chapters of a travel guide and provided a number of pages of original text and has given [] two batches of photographs stolen from his office. He has offered to provide copies of his office telex messages as "raw material" for peddling to WODUAL media outlets. AETOWHEE has agreed to a monthly retainer of DM500 and has accepted DM2,000 to date. They will split commissions from sales of the "raw material" three to one, with AETOWHEE getting the lion's share. CATOMIC/6 remains in close contact with AETOWHEE and acts as a mirror against which we can measure our progress. At one point, when AETOWHEE had real suspicions of [] CATOMIC/6 was able to alert us in time for [] to smooth things over. An audio operation was mounted from CATOMIC/50's apartment in October 1972. The "take" has provided interesting new dimensions to our knowledge of the target and has given us the opportunity of live-monitoring those AETOWHEE [] meetings which took place in the AETOWHEE apartment. AETOWHEE is in one sense already recruited and the prognosis is good that we will be able to move him gradually toward total involvement with us. See EGXA-2182, 29 March 1973, for recent developments.

2. Identity G. Identity G first came to [] attention through [] who met her several times on routine business trips to the Soviet Trade Mission. He found Identity G an unusually attractive, friendly, and outward-going person with an avid interest in obtaining any and all perfume or cosmetics samples he was able to offer her. On 1 March 1973,

S E C R E T
R Y B A T

S E C R E T
R Y B A T

- 4 -

CAFISSION provided a hint that there was possibly an extra-official relationship between Identity G and AEFORT. Subsequent reporting confirmed that they were romantically involved. Finally, CAFISSION monitored a discussion between the two on 5 April, during which AEFORT warned Identity G that a colleague, out of apparent jealousy, was spreading rumors about Identity G, including the fact she was spending nights away from her apartment. On the basis of this report, [] mounted evening and weekend surveillance of Identity G starting 5 April. Although she was not observed going out by herself, it was, at the same time, apparent that she is under no restriction and is an extremely active individual who goes out frequently and who knows her way around. Of special interest, Identity G spent two consecutive evenings in a neighborhood bar located within walking distance of her residential highrise building. On each occasions, she was accompanied by an as-yet-unidentified Soviet couple. It was obvious from their behavior that all are well-acquainted with the barkeep and his wife and are evidently regular customers of this establishment. On 12 April, [] traveled to Frankfurt to debrief the LNLUE transcriber most familiar with Identity G. From him we learned her father is the chief of a state trading corporation, and she is very strongly motivated by materialistic instincts. Money and the luxuries it can provide are subjects of absolute fascination to her. The transcriber is convinced she could be involved in financial manipulations. Meanwhile, CATOMIC/21, CATOMIC/25, CATOMIC/35, CATOMIC/58, CATOMIC/62, and CATOMIC/66 have been tasked separately to visit the bar and attempt to strike up friendships with the barkeep and/or his wife. We hope to proceed rapidly toward a recruitment working through the channel which seems to offer the best chance of success. First returns have already come in from CATOMIC/25, who visited the bar on 11 April. Although he had little chance to talk to the barkeep, he met and had several drinks with AEBATTLE, whom CADRILL reports to be an interesting potential target. The effort against Identity G will continue to the extent it does not impinge upon our work against the primary targets. (BONN 23452, 10 April 1973.)

3. DMDESK. CATOMIC/6 met DMDESK at an Identity C meeting 30 January 1973. After an introductory chat, DMDESK invited CATOMIC/6 to what turned into a lengthy conversation over cocktails and dinner. The evening was followed by two additional dinners, walks along the Rhine, and numerous phone calls, during which DMDESK volunteered a depth of information about himself and about the work in which he is engaged here.

S E C R E T
R Y B A T

S E C R E T
R Y B A T

- 5 -

Among other things, he mentioned enough fragmentary details about an NVIDEA officer he once knew to enable Headquarters to identify and debrief the gentleman. The results of this debriefing confirmed DMDESK's target potential. The NVIDEA officer described him as an exceptionally well-placed functionary who was well aware of happenings in his country and willing to signal important political developments before they became public knowledge. Soon after they were acquainted, it became clear the direction the CATOMIC/6-DMDESK friendship would take depended to a great extent on whether she was willing to enter into a physical relationship with him. She has not yet made this decision. Our other current insight into DMDESK comes from [] who meets DMDESK weekly at meetings of the Board of Directors of Identity C to which they were elected in February 1973. Possibly exploitable susceptibilities include DMDESK's apparent weakness for women (documented beyond the CATOMIC/6 experience); his Jewish ethnic background, and the uncertainties he faces when the leadership in his country changes. [] 22075, 7 February 1973 and [] 22776, 9 March 1973)

PRIMARY TARGETS DROPPED DURING REPORTING PERIOD

1. AERAVEN. This 34-year old known PDQUICK officer constituted []'s best target because of his unique relationship with CATOMIC/19. Unfortunately, CAWHISPER chose AERAVEN's closest colleague, AEWAXWING, as its priority target, and CAWHISPER monitoring of AEWAXWING's movements made it virtually impossible for us to work against AERAVEN without our efforts coming to CAWHISPER attention. As a result, and in consultation with Headquarters [] dropped AERAVEN as a primary target in February 1973. We will continue to monitor AERAVEN passively through contacts between him and CATOMIC/19, CATOMIC/20, CATOMIC/32, and [] and [] have met him and may run into him at social functions. An LNFALL cooptee may also meet and report on him. On the other hand, we have suspended tracking by CAMETRIC, CATOMIC/57, CATOMIC/62, and CATOMIC/65 and will attempt to put no new assets in touch with him. One hopeful note: AEWAXWING departed PCS on 11 April 1973. If CAWHISPER does not choose AERAVEN as a primary target vice AEWAXWING, but moves to another target, hopefully in another section of the Embassy, we may be able to resume targetting against AERAVEN.

S E C R E T
R Y B A T

S E C R E T +
R Y B A T

- 6 -

2. AEGREBE. [] dropped this 35-year old suspect PDQUICK officer in February 1973. CATOMIC/5, CATOMIC/34, and CATOMIC/52 were in contact with AEGREBE during reporting period. There was no direct staff officer contact. At one point, during a session of heavy drinking, and without [] encouragement, CATOMIC/52 made a low-keyed defection pitch to AEGREBE. AEGREBE's reaction was to suggest that in the future they drink less when together. (This resolution has since been forgotten.) Although we compiled considerable information on this target, none pointed to operationally exploitable susceptibilities. We expect that continued close contact between CATOMIC/5 and CATOMIC/52 and AEGREBE will continue and that we will continue to gain additional insights into this target. Should any of these insights indicate a susceptibility to recruitment, we will move on it. Tracking assets used against this target included CAMETRIC, CATOMIC/24, CATOMIC/37, CATOMIC/58, and CATOMIC/62 plus several [] case officers. See EGXA-2256, 17 April 1973 for recent developments.

3. AESKIMMER. This 31-year old, first-tour PDQUICK officer was dropped by [] as a primary target in February 1973. [] developed strong evidence that AESKIMMER has a drinking problem and indications he has a troubled marriage. [] considered means of exploiting the drinking problem, but concluded such attempts would likely have only a negative effect. In other words, they might cause AESKIMMER difficulty with his superiors, but would not necessarily contribute toward a recruitment. Such attempts might also have an adverse effect on our AETOWHEE operation. CATOMIC/6, CATOMIC/33, CATOMIC/50, and CAQUARRY were in contact with AESKIMMER during reporting period. [] was in true-name contact and [] was in alias contact. Identity E and Identity H also reported on AESKIMMER. Regular-to-sporadic contact between the above persons and AESKIMMER will continue, although we intend to re-target the assets and officers to the extent possible. Further tracking such as that done by CAMETRIC and all attempts at manipulation have been suspended.

4. ADEFENSE. This 54-year old suspect PDGRAVE officer was dropped by [] as a primary target in February 1973. The final manipulation was attempted at a large party given by CATOMIC/22 and CATOMIC/56 which was also attended by CATOMIC/14, CATOMIC/40, CATOMIC/41, CATOMIC/63, CATOMIC/66, and [] [] All [] operational efforts against this target indicate he is not susceptible to an operational approach. Although sporadic contact with CATOMIC/56, CATOMIC/22 and

S E C R E T
R Y B A T

S E C R E T
R Y B A T

- 7 -

CATOMIC/14 will continue, we are making no further efforts to manipulate AEDEFENSE and plan none.

Attachment 2

[] ACCESS/SUPPORT/TRACKING AGENTS

Following are the [] basic operational assets used against the Soviet and Soviet-Bloc target. The dispatch number listed for each asset is that of the most recent reporting.

CATOMIC/5 - chauffeur for various Soviet Trade Mission (STM) officials. Access agent. Salaried. [] is case officer. EGXA-2233, 10 April 1973.

CATOMIC/6 - a female journalist who specializes in interviews with important governmental, commercial, and diplomatic personalities. Contact agent. Salaried. [] is case officer. EGXA-2169, 19 March 1973.

CATOMIC/8 - widow of AEBOGUS. She is presently in charge of the Slavistics Department teaching Russian at an institute of higher learning in the Bonn/Cologne area. Tracking agent. Unsalariated. [] is case officer. EGXA-2222, 13 April 1973.

CATOMIC/14 - Sales Manager for CAFlicker and contact of senior CDU officials. Access agent. Salaried. [] is case officer. EGXA-2253, 16 April 1973.

CATOMIC/17 - an employee of Ford in Cologne. His apartment shares a common wall with CAPAYOFF. Tracking agent. Salaried. [] is case officer. EGXA-2225, 13 April 1973.

CATOMIC/18 - wife of CATOMIC/17. She is utilized as a neighborhood observer and is the operator of the photopoint located in the CATOMIC/17-CATOMIC/18 apartment. Tracking agent. Salaried. [] is case officer. EGXA-2225, 13 April 1973

CATOMIC/19 - Commercial Counselor of the KMMETER Embassy. Access agent. Salaried. [] is case officer. EGXA-2106, 27 February 1973.

CATOMIC/20 - wife of CATOMIC/19. She is a fully witting and fully responsive agent. Access agent. Salaried. [] is case officer. EGXA-2106, 27 February 1973)

S E C R E T
R Y B A T

S E C R E T
R Y B A T

- 2 -

CATOMIC/21 - a German national who manages one of the better night spots in downtown Bonn. Tracking agent. Unsalaries. [] is case officer.

CATOMIC/22 - an attractive German female who assists in the operational activities of her husband, CATOMIC/56. Contact agent. Salaried. [] is case officer. EGXA-2234, 11 April 1973

CATOMIC/23 - a Greek national who manages a leading Bonn jewelry store doing business with the Soviet Embassy. Contact agent. Unsalaries. [] is case officer. EGXA-2183, 26 March 1973

CATOMIC/24 - a retired businessman who is performing a number of miscellaneous support functions. Tracking agent. Salaried. [] is case officer. EGXA-2224, 13 April 1973.

CATOMIC/25 - an elderly female German national, the wife of CATOMIC/24, who performs operational support tasks in the Bonn/Cologne area. Tracking agent. Salaried. [] is case officer. EGXA-2224, 13 April 1973.

[]
] COMMENTS

1. This report, prepared by [] Soviet Coordinator, is a comprehensive, accurate, and succinct account of operational activities taken during this reporting period with respect to the Soviet target, the assets involved in these activities, the circumstances conditioning them, and the progress realized. Headquarters is aware of the thought, imagination, time, and work spent during the past two and one-half years in developing the complex of agent assets described in this report, assets with talents and versatility appropriate to the cultivation of a number of discrete Soviet and other targets. Having monitored this development from the remove of [] and with direct supervisory responsibility for the program for only the past few months, I feel entitled, quite impersonally, to suggest that the progress reflected herein augurs well for the definitive validation of the program in the near future in terms of solid agent recruitment -- AETOWHEE being already half-way toward that distinguished condition.

2. The targets who have been dropped from primary consideration will not be neglected for that reason as long as they remain in the Bonn area. Their elimination from the primary focus of [] concern followed long and careful scrutiny, a considerable operational investment (which may prove not entirely lost), and an empirical determination that their recruitment seemed less likely than that of targets newly selected for primary attention.

3. It is suggested that [] particularly, and all officers participating in arduous task force deliberations and purposeful operational actions involved in this program are to be congratulated for highly creditable professional performance.
