

24 DEC 1957

MEMORANDUM FOR: Director of Central Intelligence
THROUGH: Deputy Director/Intelligence
SUBJECT: Request by Director of ICA for Unclassified Intelligence
REFERENCE: Letter to DCI from Director, ICA,
12 December 1957

1. This memorandum suggests action on the part of the DCI as contained in paragraph 7.
2. The two specific suggestions made by Mr. Smith are directed toward maximization of unclassified intelligence on Bloc economic activities in the Free World. These suggestions do not imply either a new type of unclassified reporting from the field or a new unclassified publication series, but request that as much significant information and intelligence as possible be explicitly designated as unclassified.
3. Rather than seeking an increase in unclassified current information received from the field, I suspect what Mr. Smith really wants are unclassified analyses which will provide him with information on the extent and character of the Sino-Soviet Bloc economic offensive. Members of the EIC Working Group dealing with this subject do prepare for ICA and senior officials of their respective agencies unclassified staff papers on the subject which are suitable for public release.

~~CONFIDENTIAL~~

SUBJECT: Request by Director of ICA for Unclassified Intelligence

4. The two chief contributors of information and analytical effort within the EIC Working Group are the intelligence organization of State and ORR/CIA. These components have been increasingly responsive to the needs for unclassified data on Soviet economic activities by Congressional leaders and committees and by high-level officers in the Executive Department. At the same time, a substantial amount of research time is allocated to the study of the Bloc economic offensive in attempting to stay abreast of biweekly, quarterly, and semi-annual commitments. Any substantial change of focus would undoubtedly require adjustments in the present production schedule of the Working Group.

5. Classification is individually shown for each item included in the Biweekly. In response to Mr. Smith's suggestion, every effort will be made by the Working Group to declassify individual items or to select suitable unclassified alternatives.

6. The suggestion that unclassified reporting from the field be maximized and explicitly so indicated is really a matter to be decided by the collection agencies. I shall approach this problem informally

with the State member of EIC. A full-blown response would, it seems, require formal across-the-board consideration by the IAC, which I do not recommend at this time.

7. Attached is a proposed reply to the referenced letter prepared for your signature.

INTERNATIONAL COOPERATION ADMINISTRATION
WASHINGTON

OFFICE OF
THE DIRECTOR

December 12, 1957

The Honorable Allen Dulles
Director
Central Intelligence Agency
Washington 25, D. C.

Dear Allen:

In line with our telephone conversation the other day, I should like to re-emphasize the importance of our obtaining unclassified data on Sino-Soviet Bloc activities in the Free World. The Congressional leaders on both sides have a deep interest in declassifying the maximum information on the subject, as evidenced at the White House briefing of December 3. They want such information not only for themselves and their committee members but perhaps even more for broadening the knowledge of their constituents on the Soviet economic penetration effort.

The President and the Vice President have been stressing the importance of meeting this growing Soviet challenge. In connection with the request for funds for the Mutual Security Program, we must answer on an unclassified basis all kinds of questions on the Communist economic offensive. Our intelligence product on that offensive must now be geared to serve the "unclassified" consumer as well as those in the Executive branch.

Two specific suggestions come to mind which you might wish to relay to the Working Group on this subject. One, field sources should be made acquainted with the need for the maximum amount of significant unclassified information. They should be requested to make a clear distinction, in their despatches containing data on Soviet economic activities, between what is classified and what is not, with a caveat to classify only where really necessary. Secondly, the intelligence people who work on the subject here in Washington should take similar measures. Such measures will help us enormously and greatly increase our indebtedness to your organization.

Regards,

/s/ J. H. Smith, Jr.
