MEMORANDUM FOR CHAIRMAN, USIB

VIA   :   Deputy Director of Central Intelligence

SUBJECT   :   USIB Vote Sheet Action on CODIB-Proposed Statement
                    of USIB Policy on Machine Language Preparation for
                    Index and Reference Collections

                      attached)

1.   In response to reference (b), all other USIB members, by vote
sheet action, have advised the Secretariat of their concurrence in the
CODIB recommendation in reference (a) that USIB approve the policy
statement on machine language preparation for index and reference
collections set forth in paragraphs 3.a. through 3.d. of the attachment
thereto (see Tab A).

2.   The concurrences of the Army, FBI and AEC members of the
Board, as received by the Secretariat, were subject, however, to com-
ments, and these are quoted for information in Tab B.

3.   Your attention is invited to the briefing note and recommendation
of Mr. Borel on this matter (attached hereto as Tab C). Mr. Borel has
advised, in addition, that the comments of the FBI and AEC members do
not represent disagreement by those agencies in the objectives of the
proposed policy statement, but reflect in his view individual agency
difficulties in achieving complete and uniform implementation of USIB
policy in this field.

4.   Your approval, as Chairman, USIB, of the CODIB recom-
mendation is required and hereby requested to complete Intelligence

TAB B

Comments of Army, FBI, and AEC Members of USIB on

USIB-D-39.5/14

1. **Army**

"The current ACSI-MATIC conversion of files to machine language (punch cards and Flexowriter tapes) is considered partial implementation of the policy here established."

2. **FBI**

"FBI is unable at present to take positive steps toward automation of our records for budgetary reasons."

3. **AEC**

(Following statements keyed to specific paragraphs of the proposed policy statement)

"3.a. In the ADP installation being considered within the AEC for overall AEC operation, the AEC will not use internally consistent formats for entries. However, it is planned that the entries from the intelligence standpoint will provide a means for consistency with the intelligence subject code of the intelligence community.

"3.c. Since the AEC is in the process of developing an internal ADP system, this is not feasible.

"3.d. It will not be possible to make the entire AEC system compatible with the program of the intelligence community. However, the Division of Intelligence will do everything possible with regard to its functions to insure as much compatibility as possible.

"At the CODIB meeting of June 14, 1962, CODIB was made aware of the AEC ADP program as of the present time. Representatives of CODIB were invited to work with us to the extent possible in order to maximize the compatibility of intelligence interest to the AEC system."

OFFICE OF CENTRAL REFERENCE

8 June 1962

MEMORANDUM FOR: Director of Central Intelligence

SUBJECT: Proposed Statement of USIB Policy on Machine Language Preparation for Index and Reference Collections

REFERENCE: USIB-D-39.5/14, 18 June 1962

1. This paper reflects what has been Agency policy since 7 February 1961, when the CIA Automatic Data Processing Committee considered the advantages of stockpiling text in a form which could be used as input to a computer. The usual way to do this is to use a flexowriter instead of a typewriter and get punched paper tape as a by-product of normal typing in cases where machine language is desired.

25X1

2. The proposed policy statement is not controversial. It is designed to help some groups who need the blessing of the Intelligence Community to make more headway in their own departments.

3. This is a legitimate role for CODIB and USIB to play. I recommend that we do so in this case by approving this policy statement. It need not be formally considered at a USIB meeting, inasmuch as concurrence could in my opinion be secured by telephone or vote slip.
