Dear Allen;

May an old Moscow hand,
who thinks he knows the USSR well and understands
their psychology, make a suggestion?

It is, why not invite
them to make an immediate aerial inspection of
our country in the next 30 days, offering them
landing and re-fuelling facilities on American
fields?

This is advanced on the
theory that we have nothing to loose; they would
learn nothing of importance about us that they
do not already know.

But it would take the heat
off us. And I think you have done splendidly
throughout.

*P.S. This needs
no answer.*

Very sincerely,

Bill

W. F. White
