Senator Humphreys

Dear Sir

Your new letter of Apr 14th, reciprocal trade -maybe you have forgotten we told Japan as a example everthing we knew also took them thru our factories they copied everthing then you know what happened , now we are doing the same thing again for them and other countries. We should learn by experiance ,if I made a mistake all my friends would feel sorry for me ,but let me do it again and I am sure they would think I was a sap. See U S News and WorldReport article attached from recent issue, it shows what is happening, and will get worse after we tell everybody all we know and show them how to do it,how can we compete with there low wages and our high wages. See where you want to aid people that are hurt by these imports people dont want Government help they would rather work and keep busy, example tuna boats tied up on the west coast.

Allen Dulles mentions that Russia is making rapid industrial growth why not when we show them everything we are doing , in our own state we took them thru a great many factories and are doing the same for others,what we dont tell them or show them they get from others who we are telling how to do everthing and giving them the tools to do it with, we sold not farm products to amount anything it we mostly give away to the supposed starving peoples which is bunk in most instances.

*Personal
Hope this
reaches you*

Allen Dulles

Dear Sir

Please keep telling them, ~~State~~ Dept O.K,S, the vists for other countries ~~of~~

*you should read article 8000
specialists toured the ~~US~~ +
your dept paid most of the
expenses*
