

1 June 1950

MEMORANDUM FOR: Dr. H. W. Chadwell
AD/OSI

We have been asked by Commander F. C. Weisner, of the Office of Naval Research, to have one of our Scientific people address a seminar of Reserve Officers in the scientific field on the evening of 15 June at 8 P.M., in the Interior Department Auditorium.

All the people to be there are cleared for material up to and including SECRET and they will be checked on entering that night to see that there are no "sleepers" in the audience.

Would you please call Commander Weisner, code 111 extension 5755, and arrange for you or Clark, or whomever you think best, to give the CIA talk on that evening?
