SUBJECT: Army Intelligence Day

Honorable George Bush
Director of Central Intelligence
Central Intelligence Agency
Washington, DC 20505

1. The purpose of this letter is to extend a cordial invitation for you to participate in an Intelligence Day at the Army's Command and General Staff College, Fort Leavenworth, Kansas, on 22 March 1976.
2. The Intelligence Day program was initiated in 1975 to provide the students, staff, and faculty, an insight into the objectives, capabilities, and activities of the National, Defense, and Army Intelligence Communities. Last year, Intelligence Days were held at the Command and General Staff College and at the Army's Combat Arms Schools. The program is designed to contribute materially to the Army's improvement of its combat readiness and capabilities through a greatly expanded use of intelligence at all echelons. These students--1,000 are attending this year's course at Leavenworth--are the future leaders of the US Army. Intelligence Day provides them an awareness of the growing significance of intelligence in strategic and tactical operations, and gives them a basis for formulating plans, force structures, and weapon systems.
3. A suggested scope sheet for a presentation, entitled The DCI's Role in Intelligence, which it is sincerely hoped your schedule will permit you to deliver, is appended (Incl 1). Presentations, as well as the question and answer period, are at the TOP SECRET SI/SAO level to make the program as meaningful as possible. Your remarks, of course, will be privileged. Short presentations of about 40 minutes, followed by a question and answer period, have been most effective and favorably received. The great success of last year's program is reflected in the comments of GEN DePuy, Commander, US Army Training and Doctrine Command (Incl 2).
4. This year, I am again soliciting the participation of other leaders in the US Intelligence Community as indicated in Inclosure 3. Your

Dear Fred,

The initial series of Intelligence Day presentations to selected TRADOC schools was recently completed with a visit to the Infantry School. As you know, this program originated with Hal Aaron and was based on his desire to expose the Army's younger officers to the nation's intelligence capabilities and the role of national intelligence in supporting the Army's mission. He has successfully enlisted full support of the program by the heads of all the national agencies. As a result, our young combat leaders have had an opportunity to hear and direct their questions toward Dr. Hall, Vernon Walters, Sam Wilson, Danny Graham, Lew Allen, George Godding and Hal.

This a healthy and significant demonstration of the intelligence community's desire to provide the Army the best support available. The fact that our nation's senior intelligence officials are devoting the time and effort required of the program is most reassuring. I hope we can continue to visibly demonstrate this first-hand, departmental and national level interest in the education of our young officers.

My compliments and appreciation to all who have participated in the program.

Sincerely,

W. E. DeFUY
