Subject: Approval of National Intelligence Requirements for Korea.

Suggestions:

It is recommended that the drafting agency reconsider this paper in the light of the following comments:

a. The paragraph on military potentials of North Korea should be enlarged to include -

- (1) Current information on ports, landing beaches and routes inland in North Korea in amplification of that contained in JANIS No. 75.
- (2) Current information on organization, training and equipment of the Coast Guard, Maritime Customs or other units in North Korea readily convertible to naval service.
- (3) Information on marine shipping facilities, including repair and construction facilities.
- (4) Information on aeronautical matters, both military and civil.

b. Under Section II, South Korea, consideration should be given to the inclusion of data on the relations between popular groups such as labor unions and similar groups in other countries. An example of this is relations between Korean labor groups and the Communist dominated WFTU through which the Soviets are able to further their objections among the South Korean labor groups.
