Sir:

Pergaman International Information Corporation is an electronic publishing company with a special interest in computerized patent information. We are exclusive North American representatives for the International Patent Documentation Center in Vienna Austria (INPADOC). INPADOC was founded jointly by the Austrian government and the World Intellectual Property Organization, a specialized agency of the United Nations, to serve as a central authority for the collection and dissemination of official patent information from around the world. At present, patent documents from over fifty national and regional patent offices are represented in the INPADOC files.

Because national patent laws require complete disclosure of the inventor's research, patent information represents the state of the art in any technology and is perhaps the most sensitive indicator of technical and scientific developments trends around the world. Information from the INPADOC files can tell you when and where such development are taking place and who or what organizations are responsible. Studies by the U.S. Patent and Trademark Office and others have determined that 80-90 per cent of the informaton disclosed in patents is not published in any other scientific or technical literature.

A number of special features make the INPADOC files particularly useful as an information resource. For example, titles of patents from Japan, the Soviet Union and most Eastern bloc countries are translated into English. Furthermore, INPADOC is unique in its comprehensive coverage of Eastern bloc and third world countries. Coverage for most of these countries dates from 1973.

This information can be supplied to the CIA in whole or in part, and in any one of several formats, e.g., online, magnetic tapes or microfiche. We would be pleased to meet with
