28 May 1969

MC A02A Capt. Bruce R. Greisen

10,407 Maj C.J. RAMSAY

45

The following report compares the facial features of the two individuals mentioned in the caption. The report is based on the information provided in the caption and the available photographs.

2. As has been stated previously, due to the extremely poor quality and lack of definitive features on POW 45 photo, a conclusive comparison is impossible to make. To repeat the feeling of this office, Ramsay and POW have caliper lines which appear to start just above the nostril extending to the chin; each appears to have a slightly jutting chin with a horizontal indentation under the lower lip; liplines seem similar with a thin upper lip and a slightly protruding lower lip. In addition to the above, it is also noted that both individuals seem to have the same type of build. On the negative side, Ramsay seems to have a fuller and rounder face than POW but the poor quality of the POW photo precludes an accurate description of POW's face. It is regretted that a more decisive conclusion cannot be made.
