For Rodolfo.

We are sending you herewith a little study, "C.P. Penetration and Infiltration of Armed and Security Forces", which you might be able to use for LA VOZ DEL EJERCITO. This study seems to us to be too generally and academically written to lend itself to simple translation and reprinting: we therefore suggest that you hand it to MANUEL in order that he or a member of his editorial staff (provided he reads English sufficiently well) uses this study as background material for an article -- or possibly several -- for LA VOZ, showing how this general experience with communist infiltration anywhere specifically applies to the situation prevailing in the Armed Forces in the target area.
