Directorate of Science and Technology

This publication is intended to furnish the intelligence community with a timely survey of significant current scientific intelligence. The items herein are based on selected incoming reports of all kinds received during the previous week. The comments represent the views of the Office of Scientific Intelligence and the Foreign Missile and Space Analysis Center and are coordinated to the extent possible in the time available within CIA but, being based on the material at hand, are subject to change on receipt of further information or analysis. We caution against action taken solely on the basis of the preliminary evaluations herein. Substantive questions concerning items in this publication may be addressed directly to the [redacted] OSI, CIA Headquarters, Langley. [redacted]

Questions concerning distribution should be forwarded through appropriate departmental channels.

BIOLOGICAL/CHEMICAL WARFARE

First Cuban Reserve Officer Class in CW Graduates: On 31 January, 57 students were graduated from the first reserve officer class in "Chemical Warfare Defense" held in Cuba. The men were promoted to the rank of sublieutenant; the promotion order was read by a Captain Roque, [REDACTED] the Commanding Officer of the General Staff for Chemical Warfare Defense. [REDACTED]

Comment: This is the first information on Cuban formal training in CW of reserve officers, although prior data has disclosed such training for personnel on active duty. This expansion of CW instruction to the reserve component is an indication of more than casual interest on the part of the Cubans. The existence of a CW section at the Cuban General Staff level, as also in the Soviet organization, is additional evidence of Cuban awareness of CW possibilities. [REDACTED]
