Handwritten signature in a circle

MEMORANDUM FOR: Dr. David Chang
Deputy Assistant Secretary
for Science and Technology

SUBJECT: Background Information on Japanese
Science Policy and Fusion Research
for Dr. Ancker-Johnson

On trip and 24 will drop found

*7 Where are refs
10/15
8, 9, 11,
15, 17, 2
* p 21-2; 3-
for trip
82 visit*

1. We are forwarding the attached information for background use by Dr. Ancker-Johnson in preparation for her upcoming trip to Japan. Although the information on Japan's fusion R&D comes from open source Japanese publications, she might find it useful if she has not seen it. Our nuclear analysts are prepared to attempt to answer any specific questions she might have; please feel free to contact [redacted]

*4 Old memo
4 5 pm
led by*

2. The draft version of our Japan Science and Technology Policy study comes with a few strings. It has not yet been approved by Agency officials for dissemination and in all likelihood the final version will be somewhat different. Therefore, we ask that you accept and treat it as tentative. In fact we would sincerely appreciate any thoughts, comments, or suggestions which you and Dr. Ancker-Johnson might have on the paper--both before and after her trip to Japan. As we had discussed we will not cover the subject on the 29th of October but the paper's author [redacted] will be present to attempt to answer questions on the Japan-model work by our Office of Research and Development.

3. Please feel free to contact either the analysts mentioned or myself prior to our meeting on the 29th.
