APPROVED FOR RELEASE
DATE: AUG 2004

Return to ...

To: 7408.

Memo No. 314.

From: 7404/7417.

20th September, 1944.

Your telegram 0208 of 15th September.

We have taken up this matter with both the Americans and "C". Neither "C" nor the Americans are employing MULE. You will be interested to read the comments of "C" on MULE:

"I don't mind if MULE is locked up or not, though I must say that from what I know of the man I would take a lot of convincing before I would believe that there is any prospect of his going over to the enemy."

This view is also shared by GIN and BITTERS.

Although both these parties seem to be satisfied that there is no danger of MULE becoming a security menace, I still feel that it would be advisable for you to keep your eye open and to report if you find him behaving in a suspicious manner.
