APPROVED FOR RELEASE
DATE: JUL 2004

7408 thinks that it might be useful for him to be able to send telegrams direct to headquarters occasionally - particularly some of those concerning 7496.

2. Is any new machinery required in order to enable him to send such telegrams? I presume they would simply have to be despatched as usual from Gothenburg but addressed "DIGIT, LONDON".

3. Should 7408 be given special pads for this purpose?

My letter D.285.

I attach two copies of 7408's memo no.476.
