SITUATION REPORT

IRAN

Khomeini has increasingly focused his attention in recent months on President Carter in his public statements. He may have concluded that the Shah's move to Egypt rules out any chance for his extradition and now wants to punish the US for past support of the Shah.

Relations with Iraq

Iran has again accused Iraq of attacking several Iranian gendarmerie border posts, one apparently for the fourth consecutive day. Chances of an incident continue as both countries remain on alert against intruding aircraft.
