

~~SECRET~~*Office Memorandum* • UNITED STATES GOVERNMENT

(b) (3)

TO : Chairman, SIC**DATE:** 4 September 1950**FROM** : Chairman, JMSIC**SUBJECT:** Recommendation for Creation of Separate Medical Intelligence Positions Within The Armed Forces Intelligence Organizations.

The **JMSIC** recommends that a separate Medical Intelligence billet, or slot, be created within the intelligence organizations (ONI, G-2, A-2) of each of the three armed services.

It is further recommended that the proper location of the position within these organizations would be in a Scientific Division or Section or Branch, (according to the nomenclature in each armed service) in such a way that each of the three services would have its own Medical Intelligence Officer in a position and level comparable to that of the Medical Intelligence Officers of the other two services.

It is further recommended that provision be made for direct, free liaison between Medical Intelligence working levels of the three armed services, and CIA.

NOTE: Such a position already exists within ONI.

APPROVED FOR RELEASE
DATE: MAR 2007
