FARC Killings Underscore Terrorist Threat to US Citizens in Colombia

The killing in early March of three US citizens by members of the insurgent Revolutionary Armed Forces of Colombia (FARC)'s 10th Front—possibly against the orders of the group's ruling Secretariat—raises questions about the organization's command and control and highlights the heightened risk to US citizens irrespective of Colombia's nascent peace process and diplomatic maneuvering.

- The 10th Front is a notoriously undisciplined renegade unit with extensive ties to the narcotics trade, [redacted]

The FARC guerrillas had kidnapped the three US citizens on 25 February in Colombia's Arauca Department near the Venezuelan border. The guerrillas' motive remains unclear, but their concern over the US citizens' intentions in the area appears to have prompted the abduction.

From the outset the abduction did not appear to be a typical insurgent kidnapping-for-ransom operation.

- There is no evidence that the FARC planned to demand a ransom, which rebels have done in the majority of the nearly 100 cases involving the abduction of US citizens in Colombia since 1980. Guerrillas typically abduct a Colombian or local national with the foreign hostages to release later with a ransom demand, which the FARC did not do in this case. [redacted]

Intense, indoctrinated mistrust of the United States and paranoia over US intentions in Colombia aroused the guerrillas' concern and probably contributed to their decision to murder the hostages.

- Audiotapes released by the Colombian Government revealed a local FARC commander's conviction that the kidnapped US citizens were "from the CIA" and were "using the indigenous communities as a front." The commander also referred to US "plans to invade." [redacted]

The FARC guerrillas may have murdered the three US citizens in defiance of orders not to kill them from Jorge Briceno Suarez, a.k.a. Mono Jojoy, a FARC Secretariat member thought to be the organization's second in command, according to press and other reporting.

[redacted] regional commander German Briceno Suarez, a.k.a. Grannobles—who oversees several guerrilla units, including the 10th Front, and is Jorge Briceno's brother—endorsed a request from his subordinate commander to kill the three US citizen hostages and relayed it to Jorge Briceno, who denied the request.

The abduction and murder of US citizens ran counter to earlier statements by the FARC Secretariat aimed at continuing a dialogue with US officials and reveals a disconnect between the ruling body's apparent diplomatic agenda and guerrilla activities in the field. This disconnect may reflect a division between hardline military strategists and more politically astute leaders in the Secretariat itself. [redacted]

[redacted] the FARC requested contact with the US Government to gain its support for peace negotiations with Bogota and assurances of US non-involvement in Colombia's internal conflict. During a resultant meeting with US officials in December 1998, FARC representatives expressed satisfaction with the opportunity to engage the United States and indicated their willingness to cooperate in an investigation of the fate of the missing New Tribes missionaries.

- [redacted] all its contacts indicated as late as the morning of March 5—the day the hostages were killed—that the FARC was engaged in serious negotiations to arrange the victims' release. [redacted]

The FARC Secretariat's possible shortcomings in command and control over politically unsophisticated field commanders heighten the threat to US citizens in Colombia. The assassinations suggest that decades of indoctrination, propaganda, and disinformation have backfired on FARC leaders and, as a result, thugs with insurgent credentials may conduct terrorist operations without their leaders' knowledge or consent.

- The FARC issued a communique on 10 March announcing that it would judge and sanction the commander it deems responsible for the killings according to the organization's disciplinary code. The deterrent effect on other FARC guerrillas of a harsh ruling against the commander remains to be seen, but a firm ruling could improve the Secretariat's ability to rein in potential renegade units [redacted]
