SUBJECT: K-3039

1. IR #7051, "Current Trends in Soviet Contacts with the Free World", was received with great interest by another office here which has now asked me to explore the possibility of a similar production on China. The proposed study would assess Chinese contacts with the Free World with emphasis on 1955 activity and that projected for 1956, but would include anticipated participation in international Communist-front meetings.

2. [redacted] has discussed this request informally with Harald Jacobson who thought DRF might be able to start working on such a paper in March. Could you confirm the scheduling of this job and let me know the expected date of completion? [redacted] will be glad to visit Jacobson at any time to discuss particular points.
