PDNOC's Successor

Action: None, FYI

Reference: SCGA-6211, 3 January 1973

1. Subject (IDEX 1 of reference) has been encrypted  
PBDITCN and assigned [ ] [ ]

2. We would like to defer an analysis of Subject's  
handwriting until we have collected additional assessment  
data and we have some firm indication that Subject repre-  
sents a good target. Based on his position he appears to  
have very limited potential value for us. In this regard  
we would suggest that you not target intensively on Sub-  
ject. We are not advising that you ignore the exploitable  
situation offered by CASUSTAIN/15's relationship with Sub-  
ject, but we would suggest that you balance the degree of  
effort you expend against Subject with what appears to be  
his marginal potential value as a recruited agent. This  
picture may change, for example he may have well-placed  
relatives or friends, but until we have some such evidence  
Subject does not appear to warrant anything but a very  
limited operational effort.
