

<b>DISPATCH</b>		CLASSIFICATION <b>SECRET</b>	DISPATCH SYMBOL AND NO. EUCA 61 - 941
TO : COB, Salzburg (Attn: Chief, KUCLOB COS, Vienna Chief, NATCA Chief, EE Communications Officer, Vienna)		HEADQUARTERS FILE NO.	
FROM : Chief, EUCA <i>ZAC</i>		DATE 20 June 1961	
SUBJECT : Operational/GRUCROOD GRREPAIR-15 W/T Training Report		RE: "AS-3" - (CHECK "X" ONE) MARKED FOR INDEXING NO INDEXING REQUIRED	
ACTION REQUIRED		INDEXING CAN BE JUDGED BY QUALIFIED HQ DESK ONLY	
REFERENCES		DECLASSIFIED AND RELEASED BY CENTRAL INTELLIGENCE AGENCY SOURCE METHOD EXEMPTION 8028 NAZI WAR CRIMES DISCLOSURE ACT DATE 2007	
<p>1. GRREPAIR-15 arrived in Frankfurt by auto for W/T training on the third of June. He was met at identity 4 of EUCA 59-2128 by the Training Officer at 1700 hours. Training was conducted over a period of six days for a total of 48 hours of directed instruction. The Agent departed on the morning of 10 June 1961.</p> <p>2. GRREPAIR-15 was instructed in and demonstrated a good knowledge of all his operational systems and procedures. He is now considered operationally qualified and ready for mounting. As during his previous training session in January 1961, emphasis was again placed on procedures. Intensive "on-the-air" training supplemented by table and reduced distance contacts enabled GRREPAIR-15 to overcome his previous difficulties in interpreting combinations of Q signals and prosigns. The Agent progressed to a point where he was able to conduct two-way contacts without the assistance or presence of the Training Officer. Using the BYCINK/Universal training plan LTRZIK, GRREPAIR-15 averaged four contacts per day with LIMBER. Contacts were made under conditions which varied from extremely poor to very good and involved the use of the frequency change and extra schedule systems, ZIGARE and EDACEL; GROPT 50-2 procedures, and the RS-1 and RS-6 radio sets. Considering the amount of training the Agent has thus far received, his performance was good.</p> <p>3. In addition to contacts, GRREPAIR-15 was required to copy one ZIBOER type broadcast each day of training. Transmissions were made at 10 literal words per minute using the ZIDOFF format. Although he is capable of higher receiving speeds, 10 words per minute is the speed at which he is less apt to make mistakes. The first broadcast contained the UFT indicators which were deciphered correctly and entered into the signal plan used for training. GRREPAIR-15 copied all broadcast traffic without assistance.</p> <p>4. Traffic transmitted via two-way contacts and broadcasts was enciphered in the agent's primary cryptographic ZIBALT. GRREPAIR-15 demonstrated the proper usage of message indicators, message numbering, confirmation digits and kept an accurate accounting of all incoming and outgoing messages. The agent was issued his cryptographic security check, the free from control portion of which was used correctly during the training session. There are no base acknowledgements to the security check indicating control nor was a throw-away signal issued. These will be added as the agent becomes more proficient. The security check issued is as follows:</p> <p>"The agent, as long as he is free, will transmit, in the clear the 6th group of key t at following the message indicator (not including the message indicators or pad activating indicators). When controlled the agent will use the 6th group of key t at in the normal manner as specified in ZIBALT".</p> <p>GRREPAIR-15 will always complete the last used group of key text plus one additional group with the letter "D".</p>

CONTINUATION OF DISPATCH	CLASSIFICATION SECRET	DISPATCH SYMBOL AND NO. EUCA 61 - 941
<p>5. Due to lack of time, we were unable to cover GRREPAIR-15's emergency system, KOURTE. He has, however, demonstrated proficiency in the use of this system during previous training sessions. The memory phrases which were developed during a previous training period are as follows:</p> <p>Field: ALLE TAGE IST KEIN SONNTAG</p> <p>Base: DAS BESTE IST GUT GENUG</p> <p>Keyword: TAGESZEITUNG (AEZIU)</p> <p>6. The activation instructions issued to GRREPAIR-15 are those written by NATCA (see NATCA 60-725 and EUCA 60-1456). The activation event is the occupation or bypass of the Agent's area by forces hostile to the U.S.</p> <p>7. Other subjects covered during this training session were antennas, auxiliary power sources, battery charging and security. The use of the GN-58 hand generator with the RS-1 and RS-6 radio sets was demonstrated. In addition the contents of the six containers comprising his initial cache issue was discussed.</p> <p>8. Overall Evaluation: Although we consider his performance thus far as good we can only rate his overall proficiency as satisfactory. For this reason we ask that he continue to receive the same amount of training per year as previous. We feel that this is required in order that GRREPAIR-15 reach the proficiency level of other operational GRCROOND operators. The Agent's interest and desire to do better remains high and his confidence in performance has increased considerably. It is expected that GRREPAIR-15 will be issued his equipment and material late this summer at which time a CORP/3 will be prepared and distributed.</p> <p style="text-align: center;">FOR THE CHIEF EUCA</p> <div style="text-align: center; border: 1px solid black; width: 200px; height: 40px; margin: 0 auto;"></div> <p>Distributions:</p> <ul style="list-style-type: none"> <li>2 - COB, Salzburg</li> <li>3 - Chief, KUGLUB</li> <li>2 - COS, Vienna</li> <li>3 - Chief, NATCA</li> <li>2 - Chief, BE</li> <li>2 - CO, Vienna</li> <li>2 - EUCA</li> </ul> <p>TCS/ans</p>
