1. It might not be amiss to point out that I am scheduled to depart for the ZI on 14 April. It is therefore requested that Washington give priority consideration to the plans outlined in the referenced memo with cabled reply so that K-15 and I can work together on interim operational plans for the period of his absence. Further, if duly informed, I might be able to arrange his travel concurrent with mine so as to be on hand to participate in Washington discussions before leaving the agency service.
