CRITIQUE OF PROGRAM

Please give us any comments and any care to make about the testing program in which you have just participated. We hope you will be frank in your expression of opinions. It is not necessary to sign your name to this paper if you do not wish to.

No 3 - , ROMULUS.

28 March, 1952 Al/Es.

1. It was rather cold during our stay outside on the terrain. We had not expected any outside exercises and thus we had no warm underwear. The clothes we were given, were not good enough to give the body the necessary warmth. Almost everybody felt cold, especially because of lack of head-wear. The cold and the fear to catch a cold disturbed the work, influenced the results.
2. During the obstacle course there was no space to take a running start before the wall which was <sup>to be</sup> negotiated. The results would have been better if there had been more place for a running start.
3. The food was excellent. In the House-Rules it could be mentioned whether everybody should make his bed in the morning or not /whether this is a hotel- or a barracks-set-up/.
4. The personnel, from A to Z, all excellent and to be highly respected.
5. It would be good to have a piano in the house, there may also be some people who are musically inclined.
6. The tests were very carefully chosen, well explained, and will surely give a good picture of the Subjects in a frame which has been provided for.
7. When calling the people in, it would be good to tell them in which conditions they will have to live here, so that they may not take with them unnecessary things /linen, blankets etc./
8. Warm water in the bathroom - in the mornings, would be appreciated/Wednesday morning there was none/.
