1. We were also queried by the BfV on this case. We have replied that we have no suitable traces for transmittal to the BfV.
2. For your information only, our files indicate that this was a CIC, Austria, case.
3. In view of the fact that the BfV queries our organization at the same time as they query CIC, why does CIC want information from us that can be passed to the BfV? You can see that this is double work.
