

4 December 1953

MEMORANDUM FOR: CHIEF, POLITICAL AND PSYCHOLOGICAL WARFARE

SUBJECT : Daily Log

OBOPUS

[ ] reports disappointing results from the special technical monitoring of the CIA-sponsored Albanian radio broadcasts by our operations vessel in the Adriatic in late November. Although signal reception definitely improved as the vessel moved north and was clearest at the northernmost point, about 25 miles off the Albanian coast near Lesh, all except the 0730 broadcast were of poor audibility, and reception of the 0730 broadcast was clear only in the north. The broadcasts alternated between poor signal audibility and jamming (which first began in late August 1953; see Log Item, 1 September 1953). However, a contact of the recently-exfiltrated Fig team reported that all except the 1330 broadcast were clearly audible, despite jamming, in the Korçe area of southern Albania.
