7.

In this paragraph the happenings during the last years will be explained.

In July 1941 I was sent by the Academy of Sciences to Elista, Kalmuk Republic, because it was evident Leningrad soon would be besieged.

From August 1941 till July 1, 1942 I worked there on Russian and Kalmuk at the Elista Institute and worked as the editor of the newspaper "Leninski Puty" (Leninist Way). There I published several anti-Nazi pamphlets. I was anxious to leave Elista as that town was not safe and could be seized by the Germans. Besides, I was anxious to join the Academy of Sciences partly evacuated to Tashkent. I left Elista in the first days of July 1942 and travelled through the Caucasus to the Caspian Sea in order to cross the latter by steamer. As the disorder on the railways was tremendous I was compelled to stop at the town of Mikoyan Shakhra. In the end of August 1942 all those localities were taken by the Germans. At first I had troubles with the Germans who suspected me of being a Jew but I had my baptismal certificate and as I am of mixed German and Estonian descent I was registered as a "Foreign German" and let alone. I did not work in any German office, etc. As I was asked by the Russian burgomaster to lecture on ethnological subjects for the population I held several lectures on the history of the Caucasus, on the Caucasian tribes, and especially on the Karachais (a Turkic tribe). Later a tribe called "the Mountain Jews" were molested by the Germans. I explained to the latter that they were of Iranian ("Arian") origin but not a Semitic tribe. This preserved them from troubles.

In December 1942 I was deported to Germany and left the Russian soil (Ukraine) in April 1943. I arrived in Berlin in May 1943 and from June 1943 till August 1943 worked at the "Wannsee Institute" (a research centre on Russia). From August 1943 I worked at the Ost-Asien Institute and lectured at the Berlin University. In April 1945 Germany collapsed and since that time I have not worked at all.

All statements made in paragraphs 1, 2, 3, 6 and 7 can be proved by documents.
