ABSTRACT
MICROFILM

1. In order that timely appropriate action can be considered, it is essential that cable notification of the TDY and/or PCS travel of Soviet code clerks, cipher inspectors or other key communications personnel be made to Headquarters. Such notification cable should include the mode of travel and any circumstances which might play an important role in considering possible approaches or other operational actions. Included in the term "circumstances" would be the transfer of the target for disciplinary reasons, medical treatment or any other information that might indicate vulnerability.

2. While opportunities will be rare, of particular importance is the advance notice of the planned travel of such personnel via surface means where prolonged access may be possible. In this regard, train or ship travel under light escort (1 person) or without an escort is of particular importance. It should be noted that ship travel may offer some possibility for contact or development, especially where the escort leaves the target "on his own" while traveling, or escorts him to the ship, thereafter permitting the target to travel alone to the port of debarkation. All planned action should be coordinated in advance with the Chief, KUTUBE/D at Headquarters.

3. Ali reporting on this requirement should be sent to Chief, KUTUBE/D under the indicator "LAURICLE."
