FOIA-8106

25 Feb 1954

Concerns Karl HASS, apparently a German in Rome, and he contacts with persons..... " in practice HASS limited himself to giving a certain amount of attention to correspondence from Professir (fnu) SIX in connection with eventual Italo-German publishing activity in the scientific and literary fields. SIX sent HASS a number of volumes to be translated and published in Italy..... on of these books is on the activity carried out by intelligence net in enemy terriotroy - activity of the Soviet Service in German and elsewjere during the war and in part after the war. The Book " Cappella Rossa (read Pote Kapelle ") is enriched by original documentation.... ... because the rebirth of the old and well-known German review GEOPOLITIK is due to his initiative, SIX wants HASS to set up committee of Italian collaborations. Both SIX and PFEIFFER, director of the review, desire (probably really for cultural reasons) to establish relations withe the well-known professor (fnu) CIDNE, a theorist of neo-Fascism as he was a student of Benedetto CRDCE... SIX will be in Rome on Easter Saturday (1954). There is nothing new to report regarding HASS's contact with German I.S. ...

Comment: elsewhere in the same report mention is made of HASS's contact with a Soviet functionary, presumably in Rome, sometime in late 1953 or early 54. This contact took place at the Soviet Commercial Delegation offices in Rome. " The sign of recognition proposed at the time for an eventual contact between the Soviets and HASS is still in the possession of [] (50 lira note ". " Since the time of contact with the Soviets, HASS has appeared to have lost interest in any intelligence activity, seems to be disillusioned and intends cutting off all contacts ".
