SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

SOURCE: A usually reliable source (B), from personal observation. This report is an amplification of the referenced reports from the same source. Appraisal of Content: 3.

The following is a description of the area near Lilaste station, west of the Riga-Saulkrasti railroad line, opposite the restricted zone mentioned in the referenced reports.

1. There were several hundred tent excavations (sic) in the area. The excavations were arranged in groups, consisting of three or four lines per group, with 25 excavations in each line. Excavations in each line were directly opposite excavations in the next line. The excavations were about 18 feet square and 3 feet deep, and were reinforced with pine logs.
2. The tower was constructed of wood and metal. The open platform on the tower measured about six feet by nine feet. There were no wires or antennas on the tower.
