SUBJECT: GENERAL— Operational/ZIPPER
 SPECIFIC— UTILITY Proposal re UJ DREADFUL

DATE: 30 December 1952

Attn:

Reference: SPULL-4513

1. Attached is the UTILITY/SCHACK plan for further development of UJ DREADFUL. You will note that attachment represents a complete reversal of SCHACK's position in reference para 4, and adoption of the UTILITY solution described in reference para 5. Briefly, an immediate interrogation is properly dismissed as unrealistic, and a program of limitation and strict compartmentalization of UJ DREADFUL's operations and knowledge of ZIPPER is proposed. In addition to pure defensive measures, a careful surveillance of UJ DREADFUL's past and present operations and of his personal movements is to be instigated.

2. We frankly doubt that a surveillance of UJ DREADFUL operations is likely to be decisive, and the chance of installing a secure personal surveillance sufficiently close to the subject to be productive appears to be slight. However, at the moment we have no better solution, and, except for insisting upon complete coordination, we must view the case as one for ZIPPER to run.
