INTRODUCTION

1. (S//NF) On [redacted] November 2002, an individual detained by the CIA in [redacted] Gul Rahman, died. On [redacted] November, the Deputy Director for Operations (DDO) informed the Deputy Inspector General that the DDO had dispatched a team to investigate the death. In January 2003, the Office of Inspector General (OIG) initiated an investigation. This report reviews the events leading to Rahman's death.

SUMMARY (b)(1)

2. (S//NF) Rahman, a suspected Afghan extremist associated with the Hezbi Islami Gulbuddin (HIG) organization, who was approximately 34 years old, was captured in Pakistan [redacted]

[redacted] on [redacted] October 2002.¹ On [redacted]

[redacted] November 2002, [redacted] aircraft rendered Rahman from [redacted]

3. (S//NF) Between [redacted] and [redacted] November 2002, Rahman

underwent at least six interrogation sessions by Agency personnel.

The interrogation team included the [redacted] Site Manager,

(b)(1)

(b)(3) NatSecAct

[redacted] an independent contractor (IC)

before his arrival in [redacted] in July 2002. However, he acquired

some on-the-job training and experience during the [redacted] months he

had been [redacted] prior to Rahman's death.

(b)(3) NatSecAct

4. (S//NF) Rahman was subjected to sleep deprivation

sessions of up to 48 hours, at least one cold shower, and a "hard

takedown" termed "rough treatment" as reported in pre-death cables

addressing the progress of the interrogation. In addition, Rahman

(b)(1)

(b)(3) NatSecAct

reportedly was without clothing for much of his time at [redacted]

Despite these measures, Rahman remained uncooperative and

provided no intelligence. His only concession was to acknowledge

(b)(1)

(b)(3) NatSecAct

his identity on [redacted] November 2002 and, subsequently, to explain what

village he came from; otherwise, Rahman retained his resistance

posture, and demeanor. The cable from [redacted] on [redacted] November 2002

(b)(1)

(b)(3) NatSecAct

reporting that Rahman had admitted his identity stated, "Rahman

spent the days since his last session with Station officers in cold

conditions with minimal food and sleep." A psychological

assessment of Rahman, prepared by [redacted] and reported in a cable on

(b)(1)

(b)(3) NatSecAct

[redacted] November 2002, noted Rahman's remarkable physical and

psychological resilience and recommended, in part, "continued

environmental deprivations."

5. (~~S~~//NF) On the afternoon of [] November 2002, when [] guards delivered food to Rahman, he reportedly threw his food, water bottle, and defecation bucket at the guards. In addition, he reportedly threatened the guards and told them he had seen their faces and would kill them upon his release. When [] was informed of this incident, he approved or directed the guards to shackle Rahman's hands and feet and connect the shackles with a short chain. This position forced Rahman, who was naked below the waist, to sit on a cold concrete floor and prevented him from standing up.

7. (~~S~~//NF) [] Station reported Rahman's death that day in an [] cable to the DDO. The DDO dispatched an investigative team [the Directorate of Operations (DO) Investigative Team] consisting of a senior security officer assigned to the [] (b)(3) CIAAct an Office of General Counsel (OGC) (b)(3) CIAAct attorney, and an Agency pathologist to []. The DO Investigative Team conducted interviews, and the pathologist performed an autopsy of Rahman. The autopsy indicated, by a diagnosis of exclusion, that the death was caused by hypothermia.³

8. (~~S~~//NF) On 22 January 2003, the General Counsel informed the Inspector General (IG) that Rahman died as a result of the conditions at a facility substantially controlled by Agency officers. OIG initiated an investigation into the circumstances surrounding this incident and reported the death to the Department of Justice

³ (U) Hypothermia is subnormal temperature within the central body. The term hypothermia is used when an individual's body temperature is below 95 degrees Fahrenheit. This will occur when the loss of body heat exceeds heat production.

12. ~~(S//NF)~~ OIG also concludes that [redacted] [redacted] did not provide adequate supervision for [redacted] activities at [redacted]. Moreover, [redacted] bears direct responsibility for failing to include pertinent facts in his official written account of Rahman's death that led to material omissions and inaccuracies being provided to the Congressional oversight committees.

OIG reviewed the material collected during the Special Review, *Counterterrorism Detention and Interrogation Program (2003-7123-IG)*, that is relevant to this investigation. OIG also drew material for this Report from [Redacted] of the interview reports prepared during the Special Review. 151. (~~S~~//NF) The autopsy indicated, by a diagnosis of exclusion, that Rahman's death was caused by hypothermia.⁸⁸ The Final Autopsy Findings reported the cause of death as "undetermined," the manner of death as "undetermined," and the clinical impression as hypothermia.

152. (~~S~~//NF) The DO Investigative Team concluded:

- ◆ There is no evidence to suggest that Rahman's death was deliberate.
- ◆ There is no evidence to suggest that Rahman was beaten, tortured, poisoned, strangled, or smothered.
- ◆ Hypothermia was the most likely cause of death of Rahman.
- ◆ Rahman's death was not deliberate but resulted from incarceration in a cold environment while nude from the waist down and being shackled in a position that prevented him from moving around to keep warm. Additionally, this kept him in direct contact with the cold concrete floor leading to a loss of body heat through conduction.

Rahman's actions contributed to his own death. By throwing his last meal, he was unable to provide his body with a source of fuel to keep him warm. Additionally, his violent behavior resulted in his restraint, which prevented him from generating body heat by moving around and brought him in direct contact with the concrete floor leading to a loss of body heat through conduction.

⁸⁸ (U) A diagnosis of exclusion in a death case is one where all other causes of death are excluded and the clinical environment in which the victim was found is examined along with the immediate history developed during the investigation. However, no definitive tests or findings establish that diagnosis.

The paper identified Rahman as "an Al-Qa'ida operative and Hezbi-Islami Gulbuddin/Hekmatyar associate who was also a close contact of senior Al-Qa'ida facilitator Abu Abdul Rahman Al-Najdi." It reported CIA was sending a team of officers to [] to conduct an inquiry into Rahman's death, including an autopsy to determine the cause of death. 163. (S/ [redacted] On 2 May 2003, the D/OCA provided an update to the Intelligence Committees of Congress and Chairman and Ranking Member of the House and Senate Appropriations Subcommittee on Defense in the form of a background paper entitled "Death of Detainee Gul Rahman." The background paper, "Investigation by the Directorate of Operations," which included an autopsy and toxicology, disclosed that Rahman's death was accidental and most likely resulted from hypothermia."⁹² The background paper reported that Rahman was nude from the waist down and that "an autopsy disclosed several surface abrasions which he obtained within the first few days of his incarceration."⁹³ The background paper reported, "During his incarceration, Rahman threatened several times to kill [redacted] guards."⁹⁴ ... At 1500 [hours] on [redacted] November 2002 ... Rahman again threatened to kill the guards and threw his food, water bottle, and waste bucket at the guards." Finally, the background paper reported, "As a result of his violent behavior, and following procedures recommended by the U.S. BOP, Rahman was shackled to the wall in a short chain position which prevents prisoners from standing upright."⁹⁵

(b)(3) NatSecAct

⁹² (S/ [redacted] As reported above, in actuality, the autopsy reported the cause of death as "undetermined," the manner of death as "undetermined," and the clinical impression as hypothermia. The investigative report concluded, "There is no evidence to suggest that Rahman's death was deliberate."
(b)(3) NatSecAct

⁹³ (S/ [redacted] The initial report to Congress on 29 November 2002 did not report that Rahman was naked below the waist and chained in a position that forced him to sit on the concrete floor. The autopsy did not address the age of the abrasions. As explained earlier, the pathologist opined to OIG that the abrasions to the shoulders and hips occurred from one to three days, at most, before Rahman's death.

⁹⁴ (S/ [redacted] According to [redacted] Rahman reportedly threatened the guards two times only, during the week of [redacted] November and on [redacted] November.

(U) APPLICABLE LAWS, REGULATIONS AND POLICIES

164. (U) Title 18 U.S.C. §112, *Manslaughter*, provides in pertinent part :

Manslaughter is the unlawful killing of a human being without malice. It is of two kinds:

Voluntary – Upon a sudden quarrel or heat of passion.

Involuntary – In the commission of an unlawful act, not amounting to a felony, or in the commission in an unlawful manner, or without due caution and circumspection, of a lawful act which might produce death.

165. (U) Title 18 U.S.C. §2441, *Torture*, provides penalties for "who[m]ever outside the United States commits or attempts to commit torture." The statute defines the crime of torture, in pertinent part, as:

an act committed by a person acting under the color of law specifically intended to inflict severe physical or mental pain or suffering (other than pain or suffering incidental to lawful sanctions) upon another person within his custody or physical control.

166. (U) Title 18 U.S.C. §2441, *War Crimes*, provides penalties for "whomever, whether inside or outside the United States, commits a war crime" wherein "the person committing such war crime or the victim of such war crime is a member of the Armed Forces of the United States or a national of the United States." The statute defines a war crime as any conduct defined as a grave breach of the Geneva Conventions [or any protocol to such convention to which the United States is a party].⁹⁶ The proscribed conduct includes the following

⁹⁶ (U) The United States is not yet a party to either of the two "Protocols Additional to the Geneva Conventions."

relevant offenses: willful killing, torture or inhuman treatment, including biological experiments, willfully causing great suffering to body or health.⁹⁷

167. (U) On 7 February 2002, President Bush issued a memorandum noting that the "provisions of Geneva will apply to our present conflict with the Taliban" [in Afghanistan] but would not apply to Al-Qa'ida.⁹⁸ Neither the Taliban nor Al-Qa'ida would be entitled to enemy Prisoners of War status, however. Nonetheless, the President ordered, "As a matter of policy, the United States Armed Forces shall continue to treat detainees humanely and, to the extent appropriate and consistent with military necessity, in a manner consistent with the principles of Geneva."

168. (~~S~~//NF) On 24 January 2003, the General Counsel orally informed the Chief of the Criminal Division, DoJ of Rahman's death. On 13 February 2003, OIG reported Rahman's death in detention to the U.S. DoJ by memorandum.

169. (~~S~~//NF) On 29 December 2003, the Chief, Counterterrorism Section, Criminal Division, DoJ, reported by letter that it declined to pursue a federal prosecution of criminal charges in this matter. As of April 2005, the matter is under review by the U.S. Attorney's Office for the Eastern District of Virginia pursuant to the direction of the Attorney General.

⁹⁷ (U) Grave breaches are defined in the Fourth Geneva Convention Relative to the Protection of Persons in Time of War are listed in Article 147. (Article 130 of the Third Geneva Convention Relative to the Treatment of Prisoners of War lists these same offenses as "grave breaches.")

⁹⁸ (U) Memorandum from the President to the Vice President, Secretary of State, Secretary of Defense, Attorney General, Chief of Staff to the President, Director of Central Intelligence, Assistant to the President for National Security Affairs, and the Chairman of the Joint Chiefs of Staff, "Humane Treatment of al Qaeda and Taliban Detainees," dated and signed 7 February 2002.

170. (U//~~FOUO~~) Agency Regulation 13-6, Appendix I, Standards for Employee Accountability provides:

- a. Consequences will follow an employee's failure to comply with a statute, regulation, policy or other guidance that is applicable to the employee's professional conduct or performance.
- b. The lack of knowledge of a statute, regulation, policy or guidance does not necessarily excuse the employee. However, lack of knowledge may affect the level of employee responsibility and the extent to which disciplinary action is warranted. Therefore the following factors will be considered prior to holding an employee accountable for a particular act or omission:
 - (1) Agency efforts to make employees aware of the statute, regulation, policy or guidance;
 - (2) The extent of employee awareness of the statute, regulation, policy or guidance;
 - (3) The importance of the conduct or performance at issue;
 - (4) The position or grade of the employee.
- c. Any finding of deficient performance must be specific and may include omissions and failure to act in accordance with a reasonable level of professionalism, skill, and diligence.
- d. Determinations under the above standard will be based in part on whether the facts objectively indicate a certain action should have been taken or not taken and whether the employee had an opportunity and the responsibility to act or not act.
- e. Managers may be held accountable in addition for the action(s) or inaction of subordinates even if the manager lacks knowledge of the subordinate's conduct. Such accountability depends on:
 - (1) Whether the manager reasonably should have been aware of the matter and has taken reasonable measures to ensure such awareness.

- (2) Whether the manager has taken reasonable measures to ensure compliance with the law and Agency policies and regulations.

CONCLUSIONS

171. ~~(S//NF)~~ CIA had not issued any applicable custodial interrogation guidelines by the time of Rahman's detention. The practice at that time was for interrogators to propose interrogation techniques to CTC for pre-approval. [] did not take this step prior to the interrogation of Rahman. Further, a CTC legal advisor said Headquarters would not have knowingly approved several of the techniques that [] employed, including cold showers, cold conditions, hard takedowns, and the short chain restraint.

172. ~~(S//NF)~~ [] treated Rahman harshly because of Rahman's alleged stature, his uncompromising reaction to the interrogation and lack of cooperation, the pressure on [] to "break him," and [] lack of experience with a committed interrogation resister. (b)(1)
(b)(3) NatSecAct

173. ~~(S//NF)~~ On [] November 2002, [] ordered or approved the guards placing Rahman in the short chain position whereby he was compelled to sit on the concrete floor of his cell. Rahman was only clothed in a sweatshirt. This act directly led to Rahman's death by hypothermia. [] was fully cognizant that the temperature in [] had fallen sharply in November. Two individuals said that they raised the subject of the cold temperatures with [] On [] November, [] directed that actions be taken to help other detainees ward off the cold. Other officers and contractors present at [] in November 2002 stated they recognized it was very cold and some detainees were inadequately protected against the cold. They stated they were personally aware of the possibility of hypothermia, but some said they assumed it was the responsibility of someone else to address.
