and flood conditions in the intercepted chatter confirms the location of the mission in North Korea. Source Comment: Flood conditions and UN bombing attacks occurred in so many places in North Korea on the night of 31 July that no exact location for the Soviet military mission's headquarters can be determined. The heaviest concentration of UN bombing on this date, however, did occur in the Chinnampo-Kyomipo area near the Taedong river. (SUEDE, RU-TIB 1478, 18 Sep 51)
