PREFACE

The purpose of this report is to review photography of Bayram Ali Army Barracks SE Al-1 for evidence of SS-1 SCUD tactical missile unit deployment.

NPIC Report, ______ - Soviet Order of Battle - Turkestan M.D., provides the functional analysis and illustrations of this installation.

All references of vehicles and equipment in relationship to the organization of units are derived from the <u>DIA Organization and Logistical</u> Data on Soviet Ground Forces, Part 1, Soviet Ground Force Organization.

CIA IMAGERY ANALYSIS DIVISION

Elements of an SS-1 SCUD tactical missile unit have been observed at an unidentified installation immediately east of the Mary North Airfield at 37 39N-061 50E, (CIA/PIR-67046). This installation is approximately 16 nm west of Bayram Ali (See Figure 4). The presence of probable SCUD associated vehicles and equipment in both the Mary and Bayram Ali installations during the same time frame (September 1964) indicates they are probably separate battalions of an SS-1 SCUD Brigade.

The referenced <u>DIA Document of the Soviet Ground Force Organization</u> carries six missile resupply transport trailers in an SS-1 SCUD Brigade, three per battalion.

The presence of three probable SCUD missile resupply transport trailers at the Mary installation indicates a probable battalion is located there. Five probable SCUD missile resupply transport trailers were observed at the Bayram Ali installation. The two additional probable resupply trailers at this installation may indicate an increase in the <u>Table of Organization and Equipment of the SCUD Brigade</u>.
