OPERATIONAL PLANS

~~SECRET~~CACCOLA1. MISSIONS:

We propose to mount five separate operations from the eight CACCOLA trainees in the current cycle: 3 doubleton teams and 2 singletons. The respective missions will be tailored to fit the individual or team capabilities, but all follow the basic CACCOLA pattern: the main task of each of the CACCOLA agents is to establish himself in a large city (if possible on a "legal" basis), to establish and maintain W/T contact with us, and to collect and transmit operational intelligence.

Although we do not propose to assign specific intelligence targets to any of the CACCOLAS, all will receive a briefing on aircraft, airfields and radar installations so that they will be able to report on them if they have an opportunity to observe such installations (see EGMA-2229, para 3 b (3)). Several of the CACCOLAS will be briefed on the location of airfields in the vicinity of their operational areas (see attached Plans): this is to be interpreted as orientation rather than the specific assignment of a target.

2. EXFILTRATION:

With the exception of CACCOLA 10 (see Op Plan #1), no exfiltration is planned for any of the CACCOLA agents -- all are going in as "permanent residents". It is conceivable, however, that at some time in the future we would become interested in bringing one of them out; in this regard we would like to state our view that CAPABLE 1 membership should in no way preclude the use of other operational facilities for exfiltration or infiltration. For example, a CACCOLA agent could be exfiltrated through Poland with the aid of a Polish E & E net without any compromise of his identity or CAPABLE 1 membership.

3. COMMUNICATIONS:

(a) W/T: As the RS-6 is the most practical set available for the CACCOLA type of operations, all the CACCOLA agents will be furnished with one, mounted on a board as was done last year. This set is readily concealed in a briefcase or small suitcase, and has worked satisfactorily so far in our traffic with CACCOLAS 5 & 6. Each man will be supplied with one or possibly two batteries for

~~SECRET~~

the first contacts from the field, but after that they will have to find their own power. The two alternatives seem to be working off city power, or purchasing and recharging batteries, which are readily available in the Soviet Union. Silver cell batteries will also be used; they are a five-piece unit and can be easily recharged from home current. Because of the weight factor involved, the singletons will not be able to take a reserve set, while the doubleton teams may possibly take one, to be cached near the DZ. | ?

(b) Mail: All the CACCOLA trainees are receiving S/W training and will be furnished with letter drops as an alternative communications channel. Some of these drops will be furnished by CAPABLE 7, as was done last year. These names will be forwarded to Headquarters for name traces as soon as they are available. We also plan to exploit wherever possible the great mass of intercept mail being photographed and channeled to us by CIS, Berlin. Details will be forwarded when worked out. |

(c) Between Agents: With the exception of CACCOLAS 10 and 28 (see Op Plan #1), the members of the doubleton teams will be bound more by psychological than physical ties. After arriving at their area of operations they will operate separately, according to their individual instructions, and will have only indirect communication with each other (mostly through dead drops). These intra-team contact plans have yet to be worked out on the basis of the city plans and will be forwarded when ready. They will be largely based on correspondence (using a low grade S/W) via dead drops and general delivery. Recent defector information indicates that the use of General Delivery is very widespread in the Soviet Union and that any document will suffice as identification. ||

#### 4. PLAN FOR WARTIME ACTION:

The CACCOLAS are all to be briefed that in the event of the outbreak of war they are to resist being drafted, take to the woods, maintain W/T contact with Headquarters, and do everything possible to aid in the organization of partisan activity. In this connection, we would like once again to supply each of the CACCOLA agents with about \$250.00 worth of gold coins, to be cached as a wartime reserve. In view of the immediate and drastic devaluation of paper money that is sure to take place in the U.S.S.R. upon the outbreak of war, this gold reserve will be indispensable to any effective action. It is requested that the gold be in the form of old Russian coins rather than the British Sovereigns which were provided last year. It is our firm conviction that the present group of CACCOLA trainees is sufficiently intelligent to understand the enormous risk involved in attempting to use such currency now, and will honor the condition that this gold is for wartime use only.

Security Information

-3-  
~~SECRET~~~~SECRET~~5. SPECIFIC REQUIREMENTS:

All support materials -- operational and legend area briefs, target dossier requirements, DZ studies, and documentation requirements will be furnished by CSOB/IB. CSOB/IB will channel its requirements in fulfilling these needs to MKTOPAZ, KURIOT and SR. Most of these requirements have already been submitted. All questions of documentation were gone over with [ ] of the IB Section, who is handling and coordinating all requests for document blanks and cachets. ]

[ ]

~~SECRET~~

~~SECRET~~  
OPERATIONAL PLAN #1

1. PERSONNEL: CACCOLAS 10 & 28

2. INFILTRATION:

By air from Germany into the West Ukraine, if possible in the area around Vinnitsa, which has good DZ terrain and is on the RR line to Odessa. This will probably be on the same flight as CACCOLAS 20 & 21 (see Op Plan # 2).

3. MISSION:

CACCOLAS 10 & 28 will proceed from the DZ area to Nikolaev, a town well known to CACCOLA 10, from where they can reconnoiter the possibilities of establishing themselves in Odessa itself. After agreeing on a plan of action, they are to split up, and each is to attempt to obtain work and residence in Odessa, and to collect and transmit operational data via W/T.

(a) CACCOLA 10: CACCOLA 10 will be equipped with a Minox camera and will be charged with the task of document collection and photography. Besides Odessa Oblast', he is to attempt to cover the documentation from Nikolaev, Kherson, Crimea, Vinnitsa and Kamenets-Podolsk Oblast's, and of course, any others which he has a chance to cover in his exfiltration route. If possible, some of these documents will be passed on to REDSKIN agents via dead drops (see below) - if not, CACCOLA 10 will bring them out when he exfiltrates.

CACCOLA 10 may also be equipped with a binocular attachment for the Minox which acts as a telephoto lens, in which case certain airfield photo reconnaissance will be feasible, but only on an availability basis. In this regard, there are no airfields in the Odessa area listed in the target folders available at CSOB.

CACCOLA 10 is a very capable document falsifier and will be briefed on all document requirements. We can expect particularly good information from him on such questions as illegal sources of documents, methods of avoiding document controls, etc.

Exfiltration: CACCOLA 10 is to attempt to establish himself in Odessa, and to remain there through the winter of 1953-54. He is scheduled to exfiltrate in the spring or summer of 1954. Three possible routes suggest themselves: overland across the Norwegian border, perhaps escorted by one of the VACUAS or by agents produced through VAINGLORY; overland across the Polish border and into Berlin, using WIN facilities, or those set up by Cuddeford at BOB; overland across the Persian border from the Ashkhabad area to Meshed and Teheran via the ROSE facilities. We propose to give CACCOLA 10 a general briefing on all three border areas, and to brief him on specific routes and/or escorts only over W/T.

Secret-2-Information

~~SECRET~~

~~SECRET~~

(b) CACCOLA 28: CACCOLA 28 is to remain in Odessa as "permanent resident," carrying out the basic CACCOLA mission.

#### 4. COMMUNICATIONS:

(a) W/T: CACCOLAS 10 and 28 will each be equipped with an RS-6 radio, signal plans and code pads (new reduced size), and will be expected to maintain independent W/T contact with the base. Weight permitting, the team will take one reserve W/T set which they will cache near the DZ.

(b) Mails: CACCOLAS 10 and 28 will each be provided with an S/W system and with letter drops, either from CAPABLE 7, or from the CIS intercept system.

(c) REDSKIN: CACCOLAS 10 will be instructed to select spots for dead drops in Odessa and to transmit their location to us by W/T. If the REDSKIN program then turned up a likely courier in the form of a member of the crew of a foreign merchant vessel the courier could be briefed on the location of the drop, and CACCOLA 10 or 28 could be instructed to leave a report or documents in the drop, which would not be used again. In this way the REDSKIN courier channel could be tested with a minimum of risk to the CACCOLA agent involved, and might conceivably become a very satisfactory channel for the transmittal of various materials. CACCOLAS 10 and 28 will need considerable training in the selection, reporting, and servicing of dead drops for this to work; this is being incorporated into the training program.

(d) Between Agents: Because CACCOLA 10 knows the city well, while CACCOLA 28 does not know it at all, and as CACCOLA 10 will have to brief CACCOLA 28 on whatever contacts he has made before he exfiltrates, the tie between CACCOLAS 10 and 28 will have to be closer than in the case of the other doubleton teams, including periodic personal meetings for briefing. Otherwise, they will correspond via dead drops and General Delivery. The meetings and drops will be so set up that the control is in the hands of one of the two agents (probably CACCOLA 28), so that some measure of security is provided for at least one of them.

#### 5. Legends:

(a) CACCOLA 10: born 1923 in Odessa. Legend up to 1941 same as in real life except everything moved back one year. Mobilized in 1941 in Kherson. Military legend 1941-47 to be supplied by ZIPPER. Demobilized in 1947 in Dnepropetrovsk, as did not wish to return to Kherson, where no relatives left. Worked in Dnepropetrovsk from 1947-49 in semi-skilled job (to be selected from material available here at CSOB/IB), then went down to Crimea where worked as truck driver on sovkhos (material to be taken from CAPADOR-5). In 1951 returned to Dnepropetrovsk where worked for another year. Now returning to Crimea to find seasonal work.

~~SECRET~~

~~SECRET~~

Voyennyi Bilet: Dnepropetrovsk 1947; Pasport: Dnepropetrovsk 1947-52, 1952-57.

Note: The above legend, although somewhat complicated, has the advantage of building CACCOLA 10 up as a job-skipper ("litun"), and covering up for the considerable amount of travelling he will have to do.

(b) CACCOLA 28: Born 1925 in Lisichansk, Voroshilovograd Oblast'. Legend as in real life up to 1941, when mobilized into army. Military legend from 1941-1949 to be supplied by ZIPPER. Demobilized in Spring 1950 in Dnepropetrovsk (same reasons as CACCOLA 10), where received VB, and Pasport. Worked in Dnepropetrovsk in semi-skilled job, 1950-1953. Now drifting around looking for another job.

Security Information

## OPERATIONAL PLAN #2

1. PERSONNEL: CACCOLAS 20 and 21.
2. AREA OF OPERATIONS: (a) Kiev  
(b) Khar'kov
3. MISSION:

After landing, CACCOLAS 20 and 21 will proceed together to Zhitomir where they will separate. Using Zhitomir as a spring-board, each will then investigate the possibilities of obtaining seasonal employment, new documents, etc., and after caching his set, make a trip to Kiev for reconnaissance purposes. Both are to attempt to establish themselves in Kiev, to obtain work and residence there, to maintain W/T contact with the base, and to collect and transmit operational data in the general CACCOLA pattern.

Having been trained in reporting of airfields and radar installations, CACCOLAS 20 and 21 will also be briefed on the location of the following airfields:

- (a) Kiev/Brovary (B-43)
- (b) Belaya Tserkov (B-38)
- (c) Berdichev (B-37)
- (d) Korosten (B-41)
- (e) Uman (B-45)
- (f) Vasilkov (B-18)

They will be asked to report on specific items as opportunity offers.

CACCOLAS 20 and 21 are both native Ukrainians who speak both Russian and Ukrainian fluently. Their reports on the Ukrainian political situation -- though written with an anti-separatist bias -- should be of considerable value.

In the event that one of the two is unable to establish himself in Kiev, or having set himself up is forced to leave for some reason, Khar'kov will be the alternative operational area. As the second largest city in the Ukraine, a major industrial and communications center, and the gateway to the Donbas, Khar'kov seems a logical choice (CACCOLA 21 knows Khar'kov fairly well). The three airfields around Khar'kov will be assigned for coverage on an availability basis.

- (a) Khar'kov Fighter Base (B-39)
- (b) Khar'kov/Grobli (B-16)
- (c) Khar'kov/Rogan (B-17)

Security-2-Information

~~SECRET~~~~SECRET~~4. INFILTRATION:

By air from Germany into the West Ukraine, if possible into the area around Novograd-Volynskyi (The areas around Slavuta and around Sloveshcheno are known by CACCOLA 21). This will probably be on the same flight with CACCOLAS 10 and 28, although the DZ's will be different. The Novograd-Volynskyi area would be particularly good because of the large wooded areas, the accessibility of the railroad leading both to Zhitomir - Kiev and to Ternopol', and because it is located between Rovno -- the legend and documentation city -- and Kiev -- their destination -- thus providing a ready cover story.

5. COMMUNICATIONS:

- (a) W/T: As in Op Plan #1.
- (b) Mails: As in Op Plan #1 (different letter drops).
- (c) Between Agents: Unlike the situation in the Odessa operation, there will be no need for personal contact between CACCOLAS 20 and 21, except in exceptional cases, and then only after clearing through Headquarters by W/T. Normal communication between the two will be restricted to dead drop and S/W mail through general delivery. Control of all contact and communication will be in the hands of CACCOLA 20.

6. LEGENDS:

(a) CACCOLA 20: Born 1925 in Stalinsk Oblast'. 1933-40 attended 7-year school in Elenovka. 1940-41 worked in quarries in Elenovka. Summer 1941 - Sept. 1943 (period of German occupation of Stalinsk Oblast'), Subject lived in Elenovka, laid low by a back injury suffered in the quarries. In Sept 1943, after the return of the Red Army, Subject was mobilized and fought all the way to Berlin (military legend supplied by ZIPPER). After the war Subject was stationed in Germany up to his demobilization in 1950 in Rovno, where he decided to go because of army acquaintance. Subject worked in Rovno from 1950 to Spring 1953, now has obtained release from job, going to Kiev to look for better work. Passport: Rovno 1950. Voyennyi Bilet: Rovno 1950.

(b) CACCOLA 21: Born 1924 Sumi Oblast'. Pre-war legend as in real life. Following disintegration of Subject's group in woods near Sumi, Subject picked up by a Replacement Regiment, mobilized. Served in Red Army up to 1947 when demobilized, in Rovno at own request. Worked in Rovno from 1947-53, now going to Kiev with his friend CACCOLA 20. Passport: Rovno 1952. Voyennyi Bilet: Rovno 1947.

SECRET

**SECRET**

**Eye Only**

OPERATIONAL PLAN #3

1. PERSONNEL: CACCOLAS 24 and 26.
2. AREA OF OPERATIONS: Moscow
3. MISSION:

CACCOLAS 24 and 26 will travel together from the DZ area as far as Tula or Ryazan', where they will separate. Their missions are essentially the same as that given to CACCOLA 4 last year: to attempt to legalize themselves in Moscow, establish and maintain W/T contact with Headquarters, and to collect and transmit operational data as per plan CACCOLA. After separating they will operate independently, each using a town in Moscow Oblast' as a preliminary base and springboard for his attempt to establish himself in Moscow. CACCOLA 24 will try to work out of Podol'sk, while CACCOLA 26 will use Volokolamsk. In addition to other sources, CAVAN will be asked for suggestions on vulnerable spots in the Oblast'.

CACCOLAS 24 and 26 will be briefed on the location of the following airfields:

- (a) Moskva/Khamki (A-9)
- (b) Moskva/Monino (A-10)✓
- (c) Moskva/Ramenskoye (A-11)✓
- (d) Moskva/Salarevo (A-12)
- (e) Moskva/Shchelkovo (A-13)✓
- (f) Moskva/Vnukovo (A-14)✓

They will be expected to report on them on an opportunity basis.

4. INFILTRATION:

By air from Cyprus into the North Caucasus. The area <sup>east</sup> ~~south~~ of Maikop in the Krasnodar Krai looks suitable. From the DZ they would proceed by rail to Rostov, where they could stop over and get oriented. Rostov might also be a good place to obtain documentation because of the large underworld (second in reputation to Odessa). From Rostov they would have a choice of several routes. Because of the large distance involved between the DZ and the area of operations, it would be impractical for them to leave their W/T sets behind while making a preliminary reconnaissance trip; on the other hand, we need information on the controls which may be encountered on this route.

An alternative infiltration plan would be by air from Norway into the southern KFSSR, or Leningrad or Pskov Oblasts.

*initial*

*SECRET*

SECRET

SECRET

~~SECRET~~

5. COMMUNICATIONS:

(a) W/T: Same as in Op Plan #2.

(b) Mail: Same as in Op Plan #2.

(c) Between Agents: Same as in Op Plan #2 -- control in hands of CACCOLA 24.

6. LEGENDS:

?  
JH  
(a) CACCOLA 24: Born 1921. Pre-war legend essentially as in real life, mobilized 1939 in Irkutsk. Military legend to be supplied by ZIPPER. Demobilized 1946 in Astrakhan. Worked at semi-skilled job in Astrakhan 1946-53, now vacationing in Caucasus, heading to Moscow to try to find work there. Pasport: Astrakhan 1951. Voyennyi Bilet: Astrakhan 1946.

(b) CACCOLA 26: Born 1926. Pre-war legend as in real life, but remains in Ludinovo, Kaluga Oblast until 1943, when mobilized, upon return of Red Army. Military legend to be supplied by ZIPPER. Demobilized 1950 in Astrakhan, where worked in semi-skilled job until 1953, then quit job, vacationed in Caucasus with CACCOLA 24, now heading north looking for better work. Pasport: Astrakhan 1950. Voyennyi Bilet: Astrakhan 1950.

NOTE: In the event that the alternative infiltration plan has to be used, the documents and legends would remain the same, except that a Vilnius propisan and vyipisan stamp would be put in each pasport, and they would have a year's employment legend from Vilnius.

SECRET

SECRET

OPERATIONAL PLAN #4

~~EYES ONLY~~

1. PERSONNEL: CACCOLA 22.
2. AREA OF OPERATIONS: Bryansk.
3. MISSION:

CACCOLA 22 is to proceed to Bryansk, where he is to attempt to obtain work and residence, establish and maintain W/T contact, and to collect and transmit operational intelligence. Besides this basic CACCOLA mission, CACCOLA 22 will be charged with following specific tasks:

(a) Resupply of CACCOLA 6: CACCOLA 6 has already indicated that he is low on funds, and a resupply will probably be in order if we are still in contact with him next spring. CACCOLA 22 could take a trip to Leningrad, set up a dead drop, place the money there, and then inform us of the location over W/T, which would then be relayed to CACCOLA 6.

(b) Reconnaissance of Bryansk Woods: All the CACCOLA agents receive instructions that in the event of the outbreak of war they are to resist mobilization into the Soviet Army, but are to take to the woods, maintain W/T contact with Headquarters, and to attempt to organize partisan activity. The heavily wooded Bryansk area is well-suited for such activity, both by virtue of its topography and flora, and because of its strategic location near the main Central Russian transportation routes. CACCOLA 22, who will receive extra training in the subject, is to reconnoiter the Bryansk woods for likely DZ's, black base sites, and landing fields, and to transmit this information to us.

(c) Mobilization Warning: Bryansk is a major rail center (6-way junction) and any signs of wartime mobilization should be noticeable there. CACCOLA 22 will be briefed on all symptoms of such mobilization and told to report on them.

(d) Documentation Collection: The Central Russian Oblasts are probably the most desirable for legend purposes, being the area with which the majority of agent candidates are most familiar. To date, however, we have been unable to supply documentation from this area (Moscow excepted). CACCOLA 22 will be charged with the task of obtaining Passport and Voyennyi Bilet serial numbers from Bryansk, Smolensk, Tula, Orel, Kaluga and Kursk Oblasts, as well as collecting document exemplars whenever possible (these exemplars can then be passed on via dead drop as directed over W/T).

SECRET

~~SECRET~~

~~EYES ONLY~~

4. INFILTRATION: By air from Germany into the B.S.S.R., between Vilnius and Molodechno (cf CACCOLA 27). After landing, CACCOLA 22 will proceed by rail from Molodechno to Minsk, and from there to Bryansk via either Gomel or Smolensk.

5. LEGEND:

Born 1925 Bryansk Oblast. Pre-war legend as in real life. Mobilized in 1941 into Red Army; military legend to be supplied by ZIPFER. Demobilized in the fall of 1947 in Pskov, where worked in semi-skilled job from 1947 to 1953. Now has obtained release from work; visiting girl friend in Minsk, then returning to native Bryansk. Passport: Pskov 1952. Voyennyi Bilet: Pskov 1948.

6. COMMUNICATION:

(a) W/T: As in Other Op Plans.

(b) Mail: As in Other Op Plans.

Security Information  
~~SECRET~~

Security Information

~~SECRET~~

Attachment to EGMA-2877

OPERATIONAL PLAN # 5

~~SECRET~~

1. PERSONNEL: CACCOLA 27
2. AREA OF OPERATION: (1) Minsk  
(2) Brest
3. MISSION:

CACCOLA 27, as CACCOLA 5 last year, is to attempt to establish himself in Minsk, to obtain employment and residence there, to establish and maintain W/T contact with us, and to collect and transmit operational intelligence. He will also be charged with following specific tasks:

(a) Resupply of CACCOLA 5: If we still have W/T contact with CACCOLA 5 next spring, it will probably be necessary to resupply him with funds. CACCOLA 27 could do this by setting up a dead drop in Minsk, placing the money there, and transmitting the location to us by W/T, which would be relayed to CACCOLA 5. Written instructions to CACCOLA 5 could also be transmitted in this manner if desirable, although they would be more compromising if found.

(b) Brest: After establishing himself in Minsk, CACCOLA 27 is to attempt to find a legitimate reason for periodic travel to Brest or if necessary to attempt to recruit a person who has such a reason. We would then be able to set up a communications link utilizing Berlin-Brest military travel: for example, a CAPABLE 1 "defector-in-place" set up by BOB could be utilized as could train crews in which BOB may have agents. A good test of such a communication link would be the transmittal of such a valuable but non-compromising piece of material as the Minsk telephone book.

(c) Soviet War Mobilization: CACCOLA 27 will be well-briefed on all signs of wartime mobilization: located in Minsk and having a listening post in Brest, he will be in a good position to provide us with early warning of such preparations. It must be pointed out that CACCOLA 5 was not intellectually capable of carrying this task out reliably.

(d) As in the case of the Kiev team, political attitudes of the Belorussians will be important in the formulation of propaganda policy, especially in the event of the outbreak of war. CACCOLA 27 should provide a useful though also biased counterweight to the CAMBISTA approach.

(e) Air and Radar Intelligence: CACCOLA 27 will be briefed on the locations of the following airfields, and asked to report on them if he can:

- (1) Minsk/Machulishche (Dossier A-25)
- (2) Baranovich (Dossier B-61)

SECRET

Attachment to EGMA-2877

- (3) Minsk/South (Dossier A-26)
- (4) Pruzhany/West (Dossier B-54)

(f) Possible Tie-in with CACCOLA 5: It may eventually become desirable in view of the tenuous nature of our W/T contact with CACCOLA 5, to place him under the supervision of CACCOLA 27. Although CACCOLA 27 is not by nature a "leader," his greatest drawback being an oversupply of modesty, he is in all respects a more capable individual than CACCOLA 5, and would certainly be able to handle him.

#### 4. INFILTRATION:

By air from Germany into the BSSR, in the area between Vilnius and Molodechno. This will probably be on the same flight as the CAMPOSANTO #3 team, and on the same DZ as CACCOLA 22. This DZ will have the great advantage of lying between CACCOLA 27's legend and documentation city (Vilnius), and his destination (Minsk), thus fitting into his cover story. CACCOLA 27 will be able to cache his W/T set in the area of Molodechno, and make a reconnaissance trip into Minsk without it, then return and pick up his set when he has picked out a place to keep it.

#### 5. COMMUNICATIONS:

(a) W/T: As in other ops plans. If weight permits, CACCOLA 27 will be equipped with a spare RS-6 to be buried for reserve use near the DZ (this is particularly desirable in this case because of the proximity of the DZ to the operational area), but this may not prove feasible.

(b) Mails: As in other Op Plans.

(c) Brest Dead Drops: See Para 3 (b) above.

#### 6. LEGEND:

Born 1925 in Mogilev Oblast'. Legend as in real life up to 1941. Lives under German Occupation 1941-43, when mobilized into Red Army upon their return. Mil Legend to be supplied by ZIPPER. Demobilized in 1950 in Vilnius, where went because of higher standard of living. Worked in Vilnius from 1950-53, now released from work, returning to native BSSR. Passport: Vilnius 1950; Voyenny Bilet; Vilnius 1950.
