August 1949

This Preliminary Gazetteer for the Arabian Peninsula is issued in one volume as part of the National Intelligence Survey program and lists official standard names approved by the United States Board on Geographic Names. These names supersede all previous decisions on geographic names in this area.

This Gazetteer is issued on a preliminary basis to expedite availability of this work material for use in the preparation of the National Intelligence Surveys. It is contemplated that major additions and revisions will be published in supplemental volumes and that subsequently the material will be consolidated and published as a standard component of the National Intelligence Survey for the Arabian Peninsula.

Distribution of this publication is made by the Central Intelligence Agency. This document carries a RESTRICTED classification but individual names thereof are unclassified.

FOREWORD

This gazetteer includes the names of physical and cultural features in Arabia and associated islands. It contains about 6,250 entries. The scale of coverage is generally 1:1,000,000.

In a few cases where adequate information was available, the transliteration system of the United States Board on Geographic Names was used in standardizing the names. In the absence of adequate Arabic sources, reliance was placed on the first (1931) and second (1937) lists of names in Arabia published by the Permanent Committee on Geographical Names for British Official Use (PCGN). This difference in the treatment of names accounts for different spellings of the same word in the gazetteer and glossary, such as 'ayn (BGN), 'air (PCGN); dawḥat (BGN), dōhat (PCGN); and ra's (BGN), ras (PCGN). In names standardized in accordance with the transliteration system of the Board, the definite article has been written with the vowel *a*, and the *l* of the article has been assimilated when followed by *d*, *ḍ*, *dh*, *n*, *r*, *s*, *ṣ*, *sh*, *t*, *ṭ*, *th*, *z*, or *ẓ*.
