FOREWORD

This gazetteer contains about 1,500 entries for places and features of Iceland. The scale of map coverage is 1:500,000. Danish Government sources were used in standardizing the names, but in accordance with the policy of the United States Board on Geographic Names the Icelandic letters ð (edh) and þ (thorn) have been replaced by *dh* and *th*, and for technical reasons the ligature æ is herein represented by the tie: ǣ.

The following glossary contains generic terms occurring in the standard names listed in the gazetteer. Each of the meanings given applies in the case of one or more of the standard names.
